amfori BSCI farm audit
Interpretation guidelines for auditors – large farms ................................................................. 3
1. Performance area 1: Social management systems and cascade effect ................................. 4
2. Performance area 2: Workers Involvement and Protection .................................................. 9
4. Performance area 4: No Discrimination, Violence or Harassment ..................................... 14
5. Performance area 5: Fair Remuneration ................................................................................. 15
6. Performance area 6: Decent Working Hours ........................................................................ 20
7. Performance area 7: Occupational Health and Safety ........................................................ 23
8. Performance area 8: No Child Labour .................................................................................. 35
9. Performance area 9: Special Protection for Young Workers ............................................... 38
10. Performance area 10: No Precarious Employment ............................................................ 41
11. Performance area 11: No Bonded, Forced Labour or Human Trafficking  ......................... 44
1. These interpretation guidelines only apply to large farms. A large farm is defined as a farm with a workforce above 20 permanent workers.

2. The effectiveness and coherency checks in each performance area are not "must have requirements", they are for guidance only and must not be used as findings statements. The amfori system is a holistic and process-based assessment. If one or more of the effectiveness and coherency statements are not in place this does not constitute a finding. There are many ways that the auditee could be meeting the questions being asked in a performance area question. The auditor must at all times keep an open mind to the procedures and processes used by the auditee. The auditor is at all times seeking to assess if the information presented by the auditee in support of the PA question is giving satisfactory evidence of effectiveness and coherency.

3. The audit must be performed during the high-risk period. It is generally peak season, but not necessarily (e.g., application of pesticides; pruning period if temporary workers are needed).

4. The structure and employment patterns of agricultural production create vulnerabilities for women, migrant workers, and temporary workers. In all questions of the Performance Areas of this audit, the auditor needs to pay specific attention to those categories of workers. This means that:
   a. Pre-audit, the auditor shall investigate risks that are specific to the location and socio-economic context of the auditee.
   b. The auditor should prioritise visits to the production site where this workforce is occupied at the time of the audit.
   c. Worker sampling for interviews shall include representatives of vulnerable workers.
   d. All questions should be interpreted having in mind those categories of workers.
1. **Performance area 1: Social management systems and cascade effect**

1.1. **Is there satisfactory evidence that the auditee has set up an effective management system to implement the amfori BSCI Code of Conduct?**

An effective management system is crucial to ensure social performance can be integrated into the business model. With a management system in place, the auditee can take ownership over the process and continuously improve.

**Effectiveness:** To assess the effectiveness of the management system, the auditor must at least consider:

- Does the auditee’s management understand why its own good social performance is important for amfori BSCI members?
- Does the auditee’s management understand the importance and benefits of having an effective management system and related procedures in place?
- Does the auditee’s management show full commitment towards integrating the amfori BSCI Code into the auditee business culture?
- Does the auditee’s management understand the difference between short-term investment and long-lasting solutions?
- Does the auditee’s management understand the need to develop internal procedures to integrate the amfori BSCI Code into day-to-day business practices?
- Does the auditee’s management understand how business relations are affected by the implementation of amfori BSCI?

**Coherency check:** Furthermore, the auditor shall consider if the relevant documents are coherent with the statements provided by key management and workers. This is particularly important in the following cases:

- Structure of the company (including different facilities, when applicable).
- Organisational chart and reporting lines: Who decides what?
- Documented procedures: particularly for hiring, using recruitment agencies, subcontracting, dealing with grievances, training workers, promoting ethical behaviour and following up on amfori BSCI Continuous Improvement Plans.
- Work instructions, timetables, emergency instructions and instructions in case of accidents.
- Forms: most common contracts used (e.g. permanent workers, seasonal workers, apprentices).
- Relevant external documents such as applicable labour law and environmental law.
- A collective bargaining agreement (if applicable)
- Record keeping current and old records, contracts with the workforce, contracts with recruitment agencies, contracts with subcontractors, payslips, working hours, certificates, inspections, minutes of meetings with workers and workers representatives, accidents and grievance investigations.

1.2. **Is there satisfactory evidence that a senior manager has been appointed to ensure that the amfori BSCI values and principles are followed in a satisfactory manner?**

The integration of amfori BSCI in the business culture may involve several staff members, according to the size of the farm.
Effectiveness: To assess the effectiveness of the selection of right staff members, the auditor must at least consider:

The function:

- Is the owner or is part of senior management?
- Actively works towards adhering to the Code of Conduct as part of the business culture.
- Includes other duties and covers several areas of work such as strategy and business development (if relevant).
- Has decision-making power and allocated budget to succeed in the follow-up of amfori BSCI social performance.

The individual with this function has:

- A good understanding of the amfori BSCI Code of Conduct and Terms of Implementation.
- A good overview of the supply chain:
  - Which business partners are important (significant) for the business, including labour intermediaries and other service providers?
  - Which stakeholders are relevant for integrating amfori BSCI values and principles into the business culture?

Coherency check: Furthermore, the auditor shall consider if the selection of other company functions is coherent with the amfori BSCI values and principles.

- Who is in charge of implementing amfori BSCI in the business culture?
- Who is in charge of following up with the grievance mechanism?
- Who is in charge of OHS issues?
- Do these functions have sufficient skills (by training or by experience) to fulfil their responsibilities?

1.3. Is there satisfactory evidence that the auditee has a good overview of the significant business partners and their level of alignment with amfori BSCI Code of conduct?

The auditee is required to exercise a minimum duty of care and attention with respect to the selection, management and monitoring of its own significant business partners. Without this overview on whether its business partners respect the law and workers’ rights, the auditee and its clients face a social risk.

Examples of business partners are:

- Subcontractors
- Recruitment agencies
- Catering service
- Inputs Suppliers (e.g., fertilizers and chemicals; seeds and planting materials; machinery and equipment)
- Providers of agricultural services (e.g., tilling, spraying, tractor lending)

Effectiveness: To assess the effectiveness of the selection of business partners, the auditor must at least consider that the auditee:

- Has a management system to select current and future significant business partners.
- Has instructed relevant staff to take into consideration not only price and quality but also willingness to respect the amfori BSCI requirements.
Monitors current and future significant business partners’ social performance. These verifications can be conducted by either its own personnel (as long as they are qualified to do so) or third parties mandated to conduct such assessments. (The type of verification needs to be coherent with the size of the farm business and might range from regular information collection to a third-party audit).

**Coherency check:** Furthermore, the auditor shall consider if the selection of business partners is coherent with the amfori BSCI values and principles.

- Does the auditee keep accurate information on its different significant business partners?
- Does the auditee know how long business partners have been working with it?
- How familiar is the auditee with the ways in which its business partners manage their own businesses?
- Does the auditee keep records of any complaints received about its business partners? If yes, how has the auditee dealt with these complaints?

1.4. **Is there satisfactory evidence that the auditee’s workforce capacity is properly organised to meet the expectations of the delivery order and/or contracts?**

Effective workforce planning allows the auditee to reduce unnecessary subcontracting or overtime, which represent social risks for both the auditee and its clients.

**Effectiveness:** To assess the effectiveness of the workforce planning, the auditor must at least see that the auditee calculates workforce requirements and labour costs necessary for the completion of agricultural work (e.g. pruning, spraying, harvesting) and can explain seasonal variations.

**Coherency check:** Furthermore, the auditor shall consider if the planning is coherent with the amfori BSCI values and principles.

- Is the workforce planning robust enough to guarantee the respect of working hours regulations?
- Does the management have a good understanding of the production rate per production unit / per worker?
- Does the auditee have a “contingency plan” in case something slows down or interrupts production? (e.g. weather events)
- Who makes the final decision to change regular work capacity if it appears that delivery time will not be met?

**Questions 1.5, 1.6 and 1.7 are activated only when question 1.3 is answered Yes.**

1.5. **Is there satisfactory evidence that the auditee monitors how its business partners observe the amfori BSCI Code of Conduct?**

The business partners to consider are labour intermediaries, recruitment agencies and agricultural service providers.

It is expected that the auditee ensures that these business partners respect the amfori BSCI Code of Conduct.

**Effectiveness:** To assess-the effectiveness of the business partner monitoring, the auditor must at least evaluate that the auditee:
o Uses various ways to collect information from its business partners: These are some examples that may be considered depending on the size and significance of the business partner:
  - It requests regular transparent reporting related to social risks.
  - It conducts internal auditing.
  - It requests second-party or third-party audits.

o Is aware of working conditions, wages and working hours that the service providers apply to their workforce under the contractual relation with the auditee.

o Has a process in place to assess that its business partners do not subject workers to any form of coercion that falls under the definition of modern slavery (e.g. fee payment, salary retention, passport retention).

**Coherency check:** Furthermore, the auditor shall consider the coherence of monitoring business partners within the overall auditee business practice.

- What mechanisms are being used by the auditee to monitor business partners?
- How often does this monitoring take place?
- Who is responsible for this monitoring? Is that person or those people competent (as a result of training or experience)?
- Does the auditee have institutionalised processes to make necessary business decisions and/or any corrective actions to address risks found in the activities of business partners?

### 1.6. Is there satisfactory evidence that the auditee has developed the necessary policies and processes to prevent and address any adverse human rights impacts that may be detected in its supply chain?

**Effectiveness:** To assess the effectiveness of the policies and procedures to address adverse human rights impacts, the auditor must at least evaluate that:

- Management is aware of risks of human rights violations intrinsic to its sector, industry or region.
- Management is aware of the correlation between working conditions and potential human rights violations.
- Management understands that human rights impacts can be prevented and addressed.

**Coherency check:** Furthermore, the auditor shall consider the coherence of policies and procedures within the overall auditee business practice.

Prevention and remediation of any adverse human rights should at least permeate:

- The regular risk assessment conducted in the company (e.g. occupational health and safety risk assessment).
- The decision-making process regarding human resources management as well as relations with business partners.
- The available budget to address impacts and remediate victims (if relevant).
- The systematic follow up and review of the measures taken.

### 1.7. Is there satisfactory evidence that the auditee manages its business relations in a responsible manner?

**Effectiveness:** To assess the effectiveness of the way the auditee manages its business relations; the auditor must at least consider:

- What are the communication channels that allow business partners to explain their difficulties as well as progress towards aligning to the amfori BSCI Code of Conduct?
What is the basis for terminating contracts or business relations?
What are the specific clauses in the contracts about ending a business partnership?

Coherency check: Furthermore, the auditor shall consider the way the auditee manages its business relations in coherence with the amfori BSCI values and principles. The auditor will consider at least if the auditee respects the local law regarding contracts terms, working hours and payments with its business partners.

The auditee does not need to stop business with business partners that do not observe the amfori BSCI Code of Conduct as long as those partners are transparent about their difficulties and take effective actions towards improvements.

1.8. CRUCIAL QUESTION: Is there satisfactory evidence that the auditee complies with all applicable national and local laws and regulations and that all permits, licenses, records and other relevant documents are kept if required by law?

The auditor shall ensure that the auditee is compliant with national and local laws (eg. Labour Code; Agricultural Code; Environmental regulations) and regulation relevant against the amfori BSCI Code of conduct.

Effectiveness: To assess the effectiveness of the way the auditee is compliant with local laws and regulation; the auditor must at least consider:

- The auditee (management, HR Manager) knows what specific law / regulation is applicable to its situation.
- Based on the audit findings, there is no evidence that the auditee does not respect the national neither local law.
- The auditee is aware of the legal provisions and exceptions that apply to seasonal and migrant workers (e.g., contracts, social benefits).
- The auditee is able to provide evidence of records, permits, licenses as required by law.

Coherency check: Furthermore, the auditor shall consider the way the auditee manages its business relations in coherence with the amfori BSCI values and principles.

- Does the auditee and concerned staff (e.g., HR Manager) have a knowledge of the applicable law or regulation (e.g., labour Code; Agricultural Code)?
- Does the auditee know where to find information related to applicable law or regulation (e.g., local public service; internet; agricultural centre)?
- Is the auditee aware of the legal provisions and exceptions that apply to seasonal and migrant workers (e.g., contracts, social benefits)
- Is there any evidence, for any audit requirement, that the auditee does not respect the applicable law or regulation?
2. **Performance area 2: Workers Involvement and Protection**

2.1. **Is there satisfactory evidence that the auditee has established good management practices that involve workers and their representatives in sound information exchange on workplace issues?**

Whether there is a workers’ representative or not, it is expected that workers are involved in the management of workplace issues. Particular attention must be given to the involvement of seasonal / migrant workers, and eventual "communication barriers" due to linguistic / cultural differences. The communication structure might be informal if there is no specific requirement by the law (e.g., regular meetings).

**Effectiveness:** To assess the effectiveness of the way the auditee manages its business relations; the auditor must at least consider that the auditee:

- Has established communication structures to genuinely involve workers and their representatives (if any).
- Management exchanges information on workplace-related issues with workers and their representatives (if any).

**Coherency check:** Furthermore, the auditor shall consider the way the auditee involves workers and their representatives in coherence with the amfori BSCI values and principles.

- How often do the management and workers meet to discuss about improving working conditions?
- Are there minutes of such meetings taken, kept and available for consultation?
- If there are workers representatives:
  - How are the workers representative elected?
  - Are there records of the election process?
  - Are the elections affected by undesirable interference from the management?
- How does the management follow up on workers’ requests or complaints?
- How are the concerns of the most vulnerable workers (e.g. migrants, young workers) considered?

2.2. **CRUCIAL QUESTION: Is there satisfactory evidence that the auditee takes specific steps to make workers aware of their rights and responsibilities?**

**Effectiveness:** To assess the effectiveness of the steps taken to raise workers’ awareness, the auditor must at least consider that:

- Workers who are interviewed have a good understanding of their rights and responsibilities.
- Workers’ rights and obligations emanate from:
  - The law.
  - Work contracts.
  - Job descriptions.
  - Working rules of the workplace (as long as these rules abide by the law).
- Sources of rights and obligations must be available for workers and their representatives.
- Workers are regularly trained on their rights and obligations.

**Coherency check:** Furthermore, the auditor shall consider how the auditee raises awareness among the workers on their rights and obligations in coherence with the amfori BSCI values and principles.
Do interviews with workers confirm that they have a good level of awareness of their rights and obligations? Are they aware of the content of their contracts? Are they aware of the content of the rules of the workplace?

Is the person in charge of training workers qualified (by qualification or experience) to train them about their rights and obligations?

Do contracts clearly explain workers’ rights and obligations?

Are there mandatory trainings for new workers?

Are trainings or explanations provided for migrant workers taking into consideration linguistic and cultural differences?

Are workers trained on occupational health and safety? Are workers trained on how to use the grievance mechanism? (With special attention to young workers)

2.3. Is there satisfactory evidence that the auditee builds sufficient competence among managers, workers and workers representatives to successfully embed responsible practices in the business operation?

Effectiveness: To assess the effectiveness of the capacity building activities taken by the auditee, the auditor must at least consider that:

- Trainings are granted for workers representatives, managers and other decision-makers.
- The auditee ensures that management regularly receives:
  - Informative sessions on the amfori BSCI Code of Conduct.
  - Specific training for human resources; OHS and the grievance mechanism personnel.
  - Feedback on the amfori BSCI Audit results and follow up.
- The auditee has training materials related to amfori BSCI Code content available for the management and supervisory team.

Coherency check: Furthermore, the auditor shall consider the ways in which the auditee builds internal capacities in coherence with the amfori BSCI values and principles.

- How often are directors, managers and workers representatives trained on the content of the amfori BSCI Code?
- Is the material for the trainings available?
- Do interviews with managers and other decision-makers confirm a good level of awareness on social responsibility and the content of the amfori BSCI Code?
- Is the person in charge of the training qualified to train the audience?

2.4. Is there satisfactory evidence that the auditee has established, or participates in, an effective operational-level grievance mechanism for individuals and communities?

Effectiveness: To assess the effectiveness of the grievance mechanism (established or endorsed by the auditee), the auditor must at least consider that:

- Workers and communities can lodge grievances through such a mechanism.
- The grievances lodged can relate to the auditee’s actions and/or inactions that represent a potential breach of workers’ or communities’ rights.
- The mechanism allows dialogue, and continuous improvement.
The procedure for the grievance mechanism defines at least:

- A person responsible for its administration.
- Timelines to address grievances.
- Communication process to ensure that workers and community members have access to the grievance mechanism. This includes workers representatives, seasonal, migrant, temporary, young, and female workers.
- Alternative ways for lodging a complaint (e.g., through a workers’ representative or directly to the management).
- Record system of grievances lodged, including how they were investigated and addressed.

**Coherency check:** Furthermore, the auditor shall consider how the auditee defines and manages the grievance mechanism in coherence with the amfori BSCI values and principles.

- Is there a system to keep records on the grievances lodged and the history of the solutions and remediation taken?
- Are there additional measures taken to avoid any kind of discrimination to access the grievance mechanism?
- Are workers and their representatives duly informed and involved (when applicable) so grievances are processed and investigated with utmost guarantees?

3.1. **Is there satisfactory evidence that the auditee respects the right of workers to form or to join unions in a free and democratic way?**

Many countries have unions of agricultural producers, whether "general", defending the right of farmers (e.g., minimum prices; minimum wages; working conditions) or specialized (e.g., palm oil, cocoa). However, it is generally the farmers themselves that are part of these unions, and not the farm workers. The level of trade union representation among farm workers, and particularly seasonal and migrant workers, is low in most countries. Legal impediments to the right of farm workers to organize can also be in place. Where no trade unions exist, other formal and institutional workers’ organizations could be in place to negotiate on behalf of their members (e.g., worker cooperatives). When formal and institutionalized representation is not present, the auditor will pay particular attention to the auditee alignment with the requirements of Performance Area 2.

**Effectiveness:** To assess the effectiveness of auditee respect for workers’ rights to form unions, the auditor must at least consider that:

- Workers have the right to establish, join or actively participate in an association (e.g., union) of their choice.
- Unionised workers are not discriminated against.
- Workers do not need previous authorisation from the auditee to join or establish a workers’ organisation.
- There is no effort made to hinder the establishment of worker’s representation/unionisation.
- In the absence of unions, workers (including migrant and seasonal workers) can elect their representatives and are included in discussion on workplace issues with the farm owner / manager.

**Coherency check:** Furthermore, the auditor shall consider the ways in which the auditee allows workers’ rights to comply with the amfori BSCI values and principles.

- Has management interfered to prevent workers’ participation in meetings regarding unions or other workers’ organisations?
- Has management discouraged or interfered in the election process of union members or workers representatives?
- Has management appointed a “workers representative” to undermine the workers’ democratic election?
- Has management made “arrangements” to undermine the company’s obligation to respect the national law on freedom of association? (e.g., subcontracting some parts of production intentionally to avoid reaching the number of workers required to introduce workers representatives in the business).
- Have workers suffered any retaliation for participating (actively or passively) in election processes of workers representatives?

3.2. **CRUCIAL QUESTION: Is there satisfactory evidence that the auditee respects workers’ right to bargain collectively?**

**Effectiveness:** To assess the effectiveness of auditee respect for workers’ rights to bargain collectively, the auditor must at least consider that:

- Collective bargaining is used to set the rules by which the workplace is regulated and remunerated.
- Agreements are regularly renegotiated to adapt to new circumstances.
Coherency check: Furthermore, the auditor shall consider how the auditee respects workers’ rights to bargain collectively so this right is in coherence with the amfori BSCI values and principles.

- Does the auditee demonstrate understanding of the collective bargaining process?
- Do employment contracts include stipulations contrary to a collective bargaining agreement?
- Without any justification, do the stipulations of a collective agreement fail to apply to all workers in the same category?
- Has the workers representative received any benefit from the auditee for giving up on certain aspects of the negotiation?
- Is there documentary proof of recent or the latest collective bargaining agreement? Is the document available? Has the workers representative explained the content to workers?

3.3. Is there satisfactory evidence that the auditee does not prevent workers representatives from having access to or interacting with workers in the workplace?

Effectiveness: To assess the effectiveness of non-interference of the auditee, the auditor must at least consider that:

- The auditee recognises workers representatives’ rights to access to the workers in the workplace.
- The auditee understands that not allowing a worker’s representative to access workers in the workplace represents an interference with the right of freedom of association.
- If organised in line with the law, meetings with workers representatives shall be arranged during working hours and workers’ pay cannot be deducted.

Coherency check: Furthermore, the auditor shall consider how the auditee avoids interfering with workers representatives to comply with the amfori BSCI values and principles.

- Are workers representatives present in the production site(s)?
- Are there clear mechanisms to allow workers to contact and meet the workers representative?
- Are there grievances lodged with the support of the workers representative?
- How is the interaction between workers and their representatives perceived by the auditee?
4. Performance area 4: No Discrimination, Violence or Harassment

4.1. CRUCIAL QUESTION: Is there satisfactory evidence that the auditee takes the necessary measures to avoid or eradicate discrimination in the workplace?

Discrimination refers to different treatment on the basis of gender, ethnic background, national origin, religion, disability, sexual orientation, pregnancy, worker organization membership or political affiliation with regard to contracts, compensation, training, promotion, dismissal or retirement.

**Effectiveness:** To assess the effectiveness of the measures taken by the auditee to avoid or eradicate discrimination, the auditor must at least consider that:

- The auditee does not use arguments that could be considered discriminatory when:
  - Hiring.
  - In the workplace or as part of any daily work activities.
  - Firing.
  - Promoting or offering training opportunities.
  - Paying social benefits.
  - Even in cases where national law requires HIV or other medical testing for public health reasons, the results of these tests cannot be used for discrimination. Instead, additional measures of protection should be taken.

**Coherency check:** Furthermore, the auditor shall consider how the auditee ensures no discrimination against workers takes place, so it is in coherence with the amfori BSCI values and principles.

- How transparent are the grounds for a worker to be hired, promoted, or fired?
- What are the grounds for workers to be entitled to social benefits? Is overtime allocated as a means of giving “rewards” or “punishment”?
- How is the non-discrimination policy enforced? How and how often is management trained on this policy?
5. Performance area 5: Fair Remuneration

5.1. CRUCIAL QUESTION: Is there satisfactory evidence that the auditee complies with the legal minimum wage; according to legislation or the industry standard approved through collective bargaining?

The auditor must be aware of the legal minimum wage applicable for the auditee or the valid collective bargaining agreement applicable for the sector or industry. The auditor shall use as a threshold whatever is more favourable for the workers.

Effectiveness: To consider the effectiveness of the auditee’s remuneration practice, the auditor must at least consider that:

- The auditee does not pay any wage below the minimum established by the law or the collective bargaining agreement.
- In-kind benefits and bonuses may be included in the workers’ remuneration, but is not taken into account in the calculation of the legal minimum wage.
- Workers paid the minimum wage only have to work regular time. They do not have to reach the minimum wage level by working overtime.
- The verified payroll sample covers a significant period (e.g. 12 months before the date of the audit). However, the period taken during a follow-up audit shall not include the period covered by the previous audit, particularly when the verification aims at validating improvements.

Coherency check: Furthermore, the auditor shall consider that the auditee’s remuneration practice is in coherence with the amfori BSCI values and principles.

- Part-time workers: Do part-time workers receive at least the minimum wage or relevant industry standard on a “pro-rata” basis?
- Payment per production: Does the rate paid per production ensure the worker to obtain at least the applicable legal minimum wage for standard working hours?
- In probation: Is the remuneration of workers in probation periods in accordance with the law?
- Hired through agencies: Does the auditee keeps records on how, when and how much these workers receive the payment from the agency?

5.2. Is there satisfactory evidence that wages are paid in a timely manner; regularly and fully in legal tender?

Effectiveness: To assess the effectiveness of the auditee’s remuneration practice, the auditor must at least evaluate that:

- The auditee respects the three characteristics of wage payment.
  - Timely: As agreed and communicated to workers prior to their engagement.
  - Regularly: With a frequency that allows the worker to make use of her/his earnings without incurring debts.
  - Fully in legal tender: The work performed by the workers in regular working hours is to be paid in legal tender only.
- The auditee only pays “in kind” if:
  - The payment in kind is done on top of the amount due in legal tender.
  - The payment in kind is never done in alcohol or other drugs.
Coherency check: Furthermore, the auditor shall assess that the auditee’s remuneration practice is in coherence with the amfori BSCI values and principles.

- Does the auditee pay particular attention to the way seasonal workers and payment-per-production workers are paid?
- How is regular payment agreed and communicated in these cases? What special guarantees are defined by the auditee?
- How are transportation and/or housing considered in the remuneration? (If applicable)
- How are personal protective equipment and other tools needed to perform the job evaluated by the auditee? (Even if they are not to be considered part of the remuneration)
- Does the auditee pay special attention and act diligently when using “recruitment agencies” or labour brokers?
- Is the auditee aware of how and when workers receive payment from the agency?
- Does the auditee keep these records as part of its own record keeping?

5.3. Is there satisfactory evidence that the auditee provides sufficient remuneration that allows workers to meet a decent standard of living?

To verify this question, the auditor must have calculated a living wage estimate relevant for the region and based on the Anker methodology or an equivalent reference from governments, trade unions or NGOs.

Effectiveness: To assess the effectiveness of the way the auditee takes decent standards of living into consideration, the auditor must at least evaluate that:

- The auditee is aware that fair remuneration concerns all workers regardless of if they are permanent or seasonal; regardless of if they are directly or indirectly engaged.
- The auditee has a good understanding about:
  - Living costs of the workforce in the region.
  - Possible gaps existing between the actual remuneration and the fair remuneration figure.
  - Identifying potential actions to fill the gap.
- Total remuneration provided by the auditee can include the following item
  - Wages paid for up to 48 regular working hours (or whatever the maximum regular hours are according to local or national law).
  - Premium paid overtime.
  - Benefits (e.g., such as bonuses, in-kind benefits; subsidised; free transport; free living space; opportunities for education; free canteen services)
- Remuneration does not include the cost of:
  - Uniforms.
  - Personal protective equipment.
  - Training that is mandatory as part of the job requirement. For example: occupational health and safety training.
  - Any tool essential to conduct the job.

In order to give a monetary value to trainings, the auditor will calculate the training time at the rate of the regular wage.

Coherency check: Furthermore, the auditor shall consider the way that the auditee takes into account decent standards of living to comply with the amfori BSCI values and principles.

- Is the person in charge of recruiting aware of the standard of living in the region?
- Does the auditee guarantee regular information to workers on what is considered remuneration?
Are workers representatives consulted when defining the remuneration practice?

Are there grievances lodged related to remuneration as well as the quality of benefits provided?

Are different aspects of remuneration adequately detailed in the payment records?

**Area of improvement:** if the auditor finds out that the total remuneration provided to workers does not allow them to have a decent standard of living in the region, the auditor shall report the finding under "Areas of improvement" in the Fair Remuneration Performance Area.

**5.4. Is there satisfactory evidence that the auditee provides workers with the social benefits that are legally granted?**

**Effectiveness:** To assess the effectiveness of the way the auditee pays social benefits; the auditor must at least consider that:

- The auditee pays the social benefits in addition to the minimum wages and never to allow workers to only attain the minimum.
- The auditee pays social benefits to all workers regardless of if they are:
  - Seasonal workers.
  - Paid based on productivity.
  - Migrant workers or any other vulnerable group of workers.
- The auditee is aware of the social benefit content which usually includes:
  - Old age pension.
  - Survivor’s benefit.
  - Family benefits and parental leave.
  - Medical care.
  - Unemployment.
  - Sick leave.
  - Disability.
  - Work-related injury compensation.
  - Vacations.
- The auditee has signed up for a commercial insurance to cover social benefits.

**Commercial insurance:** If the country’s legislation allows the use of commercial insurance to substitute (fully or partially) the public social scheme, the auditor shall evaluate the auditee in a positive manner.

If the country’s legislation does not allow such a substitution, but workers are granted equivalent coverage, the auditor indicates that the auditee complies “partially”, and he/she specifies the circumstances accordingly.

- If the auditee is granted exceptions from social benefits.

**Exceptions from social benefits:** The auditee may submit an approval from the local labour authority or any other authorisation (e.g., from collective bargaining agreements with trade unions), permitting exemptions from social benefits which have been legally granted.

Such exceptions shall be:

- Issued in line with the corresponding procedure.
- Issued by the legal body with authority to do so.
- Valid for the current period.
- Applicable for the auditee.
The auditee shall have available the original document to prove these exemptions.

**Coherency check:** Furthermore, the auditor shall consider the way the auditee provides workers with social benefits is coherent with the amfori BSCI values and principles.

- Is the person in charge of recruitment aware of the (legally granted) social benefits for workers and can he/she explain the benefits accordingly in the recruitment process?
- Does the auditee guarantee regular information to workers on what are considered social benefits?
- Are workers representatives consulted when defining the social benefits?
- Are there grievances lodged related to the quality of social benefits that the auditee provides?
- Are different aspects of social benefits adequately detailed in the payroll?

5.5. **CRUCIAL QUESTION:** Is there satisfactory evidence that the auditee ensures that deductions are only taken under the conditions and to the extent prescribed by the law?

The auditor shall verify if there are regulations with regard to which deductions are legal and how they can be applied (e.g. collective bargaining agreement or the national law). He/she uses as a threshold the regulation which is more beneficial for workers.

Some common deductions are insurance plans, retirement savings plan, payments for purchases of company merchandise.

**Effectiveness:** To assess the effectiveness of the way the auditee ensures deductions are legal, the auditor must at least consider that:

- Deductions applied by the auditee do not result in:
  - Workers earning less than the legal minimum wage.
  - An economic benefit for the auditee.
  - A form of discrimination.
- The auditee approach to unproductive time is fair to the workers:
  - The time workers may have spent in required meetings, training sessions or under any other workplace conditions beyond their control. Such time cannot be deducted at the expense of the worker but instead must be absorbed by the employer (e.g. a machine the worker uses is under repair and this negatively impacts her/his productivity).
- Deductions cannot be made for the use of objects, buildings or services which are directly necessary for work. That includes entry fees and/or charges for the use of:
  - Tools and machines
  - Sanitary facilities
  - Drinking water
  - Washing facilities
  - Provisions of protective clothing for workers
- Deductions for services offered by the auditee (e.g. transportation or food) are charged at local market rates or lower.
- Use of the services offered by the auditee must always be voluntary.
- Deductions are not made without the explicit consent of the worker, who always needs to be first consulted to understand the reasons. Only then could she/he choose to give consent or not.
- Deductions for disciplinary measures only occur under the conditions specified by law, or due to specifications defined in a freely negotiated and established collective bargaining agreement.
- Any deduction, including the reasons therefor and the amount thereof, must be specified in the payroll record.
Coherency check: Furthermore, the auditor shall consider that auditee deductions are coherent with the amfori BSCI values and principles.

- Is the person in charge of recruiting personnel aware of applicable deductions and is he/she able to explain the deductions accordingly in the recruitment process?
- Does the auditee guarantee regular information to workers on how and under which conditions deductions apply?
- Are workers representatives consulted when defining criteria for deductions?
- Are there grievances lodged related to potentially unfair deductions?
6. **Performance area 6: Decent Working Hours**

6.1. Is there satisfactory evidence that the auditee does not require more than 48 regular working hours per week, unless exceptional cases are prescribed by law?

*ILO does not provide specific recommendation about the maximum working hours in agriculture. The auditor must be aware of the national regulation (Labour Code or Agricultural Code) and eventual collective agreement on this topic (regular working hours and exception cases). The auditor shall use as a threshold whatever is more favourable for the workers.*

**Effectiveness:** To assess the effectiveness of the way the auditee ensures regular working hours, the auditor must at least consider that:

- Regular working hours do not exceed:
  - 48 in a week.
  - 8 per day.

These exceptions give flexibility to the limit of daily hours as well as weekly hours. However, average working hours within three months or less cannot exceed 48 hours per week.

**Coherency check:** Furthermore, the auditor shall consider how the auditee enforces regular working hours to be coherent with the amfori BSCI values and principles.

- Is the person in charge of recruitment aware of the legal limits of working hours and the possible exceptions? Can he/she explain workers’ working hours accordingly in the recruitment process?
- Are exceptions communicated and agreed upon prior to the recruitment?
- How is the definition of shifts reached? Is the workers representative involved in the process? Are the people in charge of occupational health and safety risk assessments consulted?
- Are there grievances lodged related to alleged company disregard for regular working hours?
- How are customary and/or religious practices taken into account when the auditee defines working hours and shifts?
- Are workers aware of the regular working hours and possible exceptions? Are exceptions documented and made available?

6.2. **CRUCIAL QUESTION:** Is there satisfactory evidence that the auditee request of overtime is in line with the requirements of the amfori BSCI Code of Conduct?

**Overtime:**

- Any working hours exceeding the regular hour limit.
- It must be paid in a premium rate.

If the national legislation has set a limit of regular working hours below 48 hours per week (e.g. 40 hours per week), working hours exceeding that limit are considered overtime.

**Most countries’ legislations define:**

- Temporary exceptions where regular working hours can be exceeded. E.g.:
  - Force majeure.
  - Threat or actual accident.
  - Urgent work to be done to machinery.
  - Peak season (e.g. seedling; harvest).
- Overtime limits (e.g. no more than 3 hours per day)
- Premium rate that applies to overtime. E.g.:
  - 25% more than a regular working hour.
  - 40% more if overtime occurs on Sunday.

**Effectiveness:** To assess the effectiveness of the way the auditee ensures fair overtime; the auditor must at least consider that:

- The auditee is aware of the regulation that applies to its own industry.
- The auditee enforces a procedure or process for overtime, particularly with regard to temporary exceptions. This procedure or process:
  - Originates in an agreement between workers representatives and the auditee.
  - Sets the daily limits of work over the exceptional period.
  - Sets the premium rate paid by the auditee.
  - Respects any other criteria defined by law.
- Legal permanent exception: If the auditee belongs to a type of industry covered by a legal permanent exception, the auditee keeps updated documentary proof of the agreement that backs up its claim. This agreement must have force of law and define:
  - Type(s) of exceptions.
  - Categories of workers affected.
  - The maximum allowance of additional working hours in each case.
  - The premium rate for overtime which will not be less than 25% more than the regular rate.

**Coherency check:** Furthermore, the auditor shall consider the coherence with the amfori BSCI values and principles.

- Is overtime voluntarily agreed, unless in cases of temporary exceptions (e.g. force majeure) which need to be described in the contract?
- Is overtime exceptional rather than repeatedly added onto regular working hours?
- Does the auditee take the necessary measures to ensure that overtime decreases the risk to workers’ health and safety? Are people in charge of occupational health and safety risk assessments consulted?
- Is the payment of overtime made in accordance with the law?
- Does the auditee take into consideration?
  - The vulnerability of temporary workers, migrant workers and piece rate workers to excessive overtime?
  - The accumulation of fatigue related to shift systems.
  - The special protection for young workers, pregnant women, and night shift workers?

**Note:** The auditor needs to justify in any finding why any overtime that is identified does not meet any or all of the criteria mentioned above.

The auditor pays particular attention to piece rate workers, as these kinds of arrangements, based on productivity, still need to comply with the requirements for overtime.

### 6.3. CRUCIAL QUESTION: Is there satisfactory evidence that the auditee grants workers the right to resting breaks in every working day?

**Effectiveness:** To assess the effectiveness of the way the auditee grants workers the right to rest, the auditor must at least consider that:

The workers are granted:
Short breaks: Workers are allowed to take short breaks during working hours, especially when the work is dangerous, monotonous, or exposed to specific risks (e.g., sun), to enable workers to recover their vigilance. Their number and length shall depend on the nature of work.

Meal break: Workers are allowed to take the necessary time for meal breaks according to the law.

Night rest: Workers working during the day must have at least eight hours to sleep/rest within a 24-hour period.

Adequate areas: Workers have access to areas where resting breaks can be effective. E.g.:
- For workers on the fields: rest area shaded from the sun, with at least drinkable water available.
- For indoor workers: access to ventilated areas, accessible toilets.
- Possibility for changing the physical working position (either sitting down or standing up).

If there is no dedicated area for breaks, then the break should be long enough for the workers to be able to go home and come back.

Coherency check: Furthermore, the auditor shall consider that the way the auditee grants resting breaks is in coherence with the amfori BSCI values and principles.

- What are the jobs that could require more resting breaks because of danger or monotony?
- How are customs or religious practices taken into consideration for defining resting breaks?
- Are workers informed about the time they have for resting breaks during the day?
- Are there grievances lodged concerning potential disrespect for resting breaks?
- Do accident records indicate more contingencies after long periods of work without resting?

6.4. CRUCIAL QUESTION: Is there satisfactory evidence that the auditee grants workers the right to at least one day off in every seven days, unless a different agreement has been reached through collective bargaining?

Effectiveness: To assess the effectiveness of the way the auditee grants workers the right to rest, the auditor must at least consider that the auditee:

- Respects relevant regulations for days off in the country or region (e.g. the day off shall follow national law or custom).
- Grants a full calendar day off in every seven days, unless a freely negotiated collective bargaining agreement or national law defines otherwise.
- Have a copy of this collective bargaining agreement (if applicable) accessible for workers and during the audit.

Coherency check: Furthermore, the auditor shall consider if the way the auditee grants one day off is in coherence with the amfori BSCI values and principles.

- How are customs or religious practices taken into consideration for the day off?
- Are workers informed about the time they have for resting breaks during the day?
- Are there grievances lodged concerning potential disrespect for resting breaks?
7. Performance area 7: Occupational Health and Safety

7.1. Is there satisfactory evidence that the auditee evaluates health and safety risks posed to all workers and takes actions to prevent accidents, injuries or health issues associated with the work, in accordance of the health and safety applicable regulations?

The expected level of details of this analysis will be determined by the auditor according to the risks presented by the activity and on the applicable health and safety regulation.

**Effectiveness:** To assess the effectiveness of how the auditee identifies HS risks related to its activity and takes preventive measures, the auditor must at least consider:

- The auditee identifies hazards and assess risks (e.g. toxic chemicals; heavy machinery; sun exposure; heat process).
- The auditee has set up an OSH policy that is:
  - appropriate to its size and the nature of activities.
  - compliant with relevant OSH national laws and regulations.
- The auditee takes actions to prevent the identified risks.

**Coherency check:** Furthermore, the auditor shall consider how the auditee's OSH complies with the amfori BSCI values and principles.

- Does the workplace have a written, posted and signed occupational safety and health (OSH) policy?
- Does the workplace have an OSH committee? If yes, are there women workers on this committee? Permanent and Temporary workers?
- Does the level of details given by the auditee is enough regarding the risks presented?
- Do the workers, during interviews, identify risks that are not considered by the auditee?

7.2. Is there satisfactory evidence of active cooperation between management and workers (and/or their representatives) when developing and implementing systems towards ensuring OHS?

Active cooperation between management and workers and their representatives presents an opportunity for the auditee to understand:

- Urgent demands from workers that need to be solved in the short-term.
- Necessary medium- and long-term improvements to eventually implement.

**Effectiveness:** To assess the effectiveness of how the auditee management cooperates with workers, the auditor must at least consider:

- To what extent workers and the auditee exchanges about OHS system during their regular meetings?
- Are there any risky situations related to OHS raised by the workers, not considered by the auditee?
- To what extent workers and their representatives are consulted during the risk assessment, the development and implementation of the OHS systems.
- If required by law,
  - The auditee has set up an occupational health and safety committee (or alternative structure) of democratically elected workers representatives.
- The OHS committee is regularly active and meeting minutes record their decisions.

**Coherency check:** Furthermore, the auditor shall consider how the auditee management cooperates with workers to comply with the amfori BSCI values and principles.

- Is OHS a topic during meetings between workers and the auditee?
- How often the workers recommendations are taken into consideration and what are the auditee reasons to disregard them?
- If there is an OHS committee or equivalent structure:
  - Do workers who are members receive adequate training?
  - How often does the OHS committee (or alternative structure) meet? How are their recommendations communicated to the decision-maker(s)?

7.3. **Is there satisfactory evidence that the auditee regularly provides OHS trainings to ensure workers understand their personal protection, including workers in the night shift?**

Special attention must be given to migrant workers and young workers.

If the auditee is using intermediaries or agencies to contract workers, the auditor will verify that contracted workers have received equivalent level of training / information on OHS and safety measures.

OHS training can take place in a formal setting and/or through provision of verbal information. In the latter case, the auditor will verify that workers in different categories (e.g., permanent, and seasonal) have been made aware of OHS risks and safety measures relevant for their tasks. OHS measures relate to:

(a) the preparation, handling, application, storage, and transportation of chemicals.
(b) agricultural activities leading to the dispersion of chemicals.
(c) the maintenance, repair and cleaning of equipment and containers for chemicals; and
(d) the disposal of empty containers and the treatment and disposal of chemical waste and obsolete chemicals.

**Effectiveness:** To assess the effectiveness of how the auditee provides OHS training to workers, the auditor must at least consider:

- Meeting legal expectations: Workers training on OHS needs to meet expectations required by national law. E.g.: Basic training usually focuses on:
  - Training on how to use personal protective equipment (PPE). The training pays particular attention to vulnerable workers and includes: cleaning, replacing when damaged and appropriate storage of the PPE.
  - Training on how workers need to react in case of injury to themselves and/or fellow workers.
- Appropriate training: The content of the training provides appropriate information as well as comprehensible instructions on safety and healthy work environments for workers.
- Appropriate frequency: The training frequency shall take staff turnover into account.
- Supervision: Workers have the information on the hazards and risks associated with their work and are supervised when necessary. They know what actions must be taken to provide themselves with the necessary protection.
- Adequate guidelines: Workers’ guidance and supervision takes into account workers’ levels of education and languages applied to the workplace.
If Relevant:

- Evacuation and firefighting drills: These drills are documented with clear indication of the purpose; the dates; the results and the duration. The time for evacuating the building should be recorded and never exceed nine minutes.

Coherency check: Furthermore, the auditor shall consider if the auditee's OHS training to workers is in coherence with the amfori BSCI values and principles.

- Do workers receive proper training on how to use and maintain their personal protective equipment?
- If relevant: Do workers participate in evacuation drills and/or fire-fighting drills?
- Have workers received trainings on:
  - Basic hazard awareness?
  - Site specific hazards?
  - Safe work practices?
  - Emergency procedures for fire and evacuation?
  - Natural disasters, as appropriate?
- Do management, supervisors, workers, and occasional visitors to areas of risks receive training?
- Are workers who operate machinery and power generators properly qualified to uphold safety regulations and operating procedures? Qualifications can be achieved by means of training and/or experience.
- Do people working with electrical installations and equipment understand their tasks and safety procedures?
- Do workers who handle and/or administer hazardous substances receive specific training? These are examples of hazardous substances: chemicals, disinfectants, crop protection products, biocides.

7.4. Is there satisfactory evidence that the auditee enforces the use of Personal Protective Equipment alongside other controls and safety systems?

Effectiveness: To assess the effectiveness of the way the auditee enforces the use of PPEs; the auditor must at least consider that the personal protective equipment provided by the auditee is:

- Effective: Offers effective protection to the worker and occasional visitors. Particular attention shall focus on specific potentially harmful processes (e.g. fumigation) as an example.
- Comfortable: Does not cause unnecessary inconvenience to the individual and are adequate for women and men.
- Free of charge: The auditee does not charge workers any cost for using the PPE.
- Suitable: Suits the activities undertaken.

Coherency check: Furthermore, the auditor shall consider if the ways in which the auditee enforces PPE are coherent with the amfori BSCI values and principles.

- Do workers receive proper training on how to use and maintain their personal protective equipment?
- Is the use of PPE based on the information gathered through the OHS risk assessment?
- Is management, particularly supervisors, being trained on how to use and maintain PPE? Are they aware of the protocol to ensure workers use PPE?
- Is there a procedure to control the quantity of PPE so that it always matches the number of workers, including during peak time?
- Is there a procedure that aims to ensure PPE is high-quality and effectively protects workers no matter what and regardless of costs?
- Are there any grievances lodged with regard to the potential neglect of enforcing the use of effective PPE?
7.5. **Is there satisfactory evidence that the storage of chemicals is adequately safe for people and environment; toxic agrochemicals are never stored in living quarters, and access is restricted?**

The storage of chemicals is adequately safe for people and environment as prescribed in MSDS manuals that are received when purchasing chemicals. These MSDS manuals must be in the main language of the auditee and translated into other languages as required. Toxic agrochemicals are not stored in living quarters and access to chemicals is restricted when on storage. It must be visited by the auditor.

**Effectiveness:** To assess the effectiveness of the way chemicals are stored properly, the auditor must at least consider that:

- The agrochemicals are stored in an adequate place, with restricted access:
  - The products are not located in living quarters.
  - The products are stored out of reach of children and pets and are accessible only to people trained on the chemicals use (e.g., locked cabinet).
  - The local shall be ventilated.
  - The local is not located in place where flooding is possible.
- The agrochemicals are safely stored:
  - The products are stored in their original containers with the label and instructions.
  - The liquid chemicals are not stored above solids.
  - The different classes of chemicals are separated to prevent reactions.
  - Animal feeds, seeds and fertilisers are separated from other chemicals.

**Coherency check:** Furthermore, the auditor shall evaluate consider if:
Workers that have access to the chemicals are trained on their use and disposal.

7.6. **Is there satisfactory evidence that the auditee makes potential hazards visible to the workers through signs and warnings?**

Potential hazards must be visible in agricultural installations (e.g., farm workshops, animal housing, storage facilities, wells and pumps, crop and machinery).

**Effectiveness:** To assess the effectiveness of the ways in which the auditee makes visible potential hazards, the auditor must at least consider that:

- The types of signs and the places chosen for their display are appropriate.
- The warnings are suited to point to potential hazards. E.g.:
  - Chemicals
  - Electricity
  - Hot surfaces
  - Falling objects
  - Slippery floors
  - Machinery and vehicles

**Coherency check:** Furthermore, the auditor shall consider that the ways in which the auditee makes visible potential hazards is coherent with the amfori BSCI values and principles.

- Do workers understand the meaning of the signs and warnings?
- Is the type of hazard identified in the OHS risk-assessment? Are the workers and their representatives contributing to this aspect of the risk assessment?
Do the types of hazards, with warnings about them, relate to accident and emergency procedures?

Is the effectiveness of the signs regularly monitored or reported on? How often?

If children are present on the farm, do they have an assigned play area? Is it separated from the work area?

7.7. Is there satisfactory evidence that the auditee has and properly uses procedures, processes and systems for reporting and recording occupational accidents and injuries?

**Effectiveness:** To assess the effectiveness of the way the auditee reports and records accident and injuries, the auditor must at least consider that:

- Reporting: The auditee has systems in place that enable workers to report immediately to their supervisors any situation which may present a danger to people's lives or health. Accidents and near-misses should be reported.

- Recording: The auditee keeps records on all accident and injury records by specifying:
  - When the accident took place (e.g. date, peak season, picking season)?
  - Who was involved?
  - What were the actions taken?
  - What was the final result (death, injury)?
  - How were the accidents (or work-related diseases) investigated?
  - What prevention and remediation actions were taken?
  - For how long the workers were incapacitated?

**Coherency check:** Furthermore, the auditor shall consider that the way the auditee reports and records accidents and injuries is coherent with the amfori BSCI values and principles.

- Do workers understand the protocol to report accidents and injuries to their supervisors? Are they able to evaluate the seriousness of potential dangers in the workplace?

- Do workers receive training on how to prevent and respond to the most frequent accidents or injuries that happen in their area of work?

- (How) are the accident records used to apply lessons learned to improve safety in daily operations? How are these lessons learned incorporated into the revision of accident and injury protocols?

- Are there indications that most accidents or injuries are experienced by vulnerable workers? Are there specific measures meant to prevent this so vulnerable workers receive particular kinds of protection?

7.8. **CRUCIAL QUESTION:** Is there satisfactory evidence that the auditee respects the worker's right to remove herself/himself from imminent danger without seeking permission?

**Effectiveness:** To assess the effectiveness of the way the auditee respects the workers' right to remove themselves from imminent danger, the auditor must at least consider that:

- The auditee has trained all workers in the right to remove themselves from situations of imminent danger.

- Workers are well-informed of this right as part of the training on OHS.

- Workers are well-informed on what to do in case of imminent risk of danger.

- The right applies to the workplace and residential facilities provided by the auditee.
Coherency check: Furthermore, the auditor shall consider that the way the auditee respects the workers’ right to remove themselves from imminent danger is coherent with the amfori BSCI values and principles.

- Are workers aware that they have this right? Does it apply to the workplace and residential facilities? Does the auditee take additional measures to ensure vulnerable workers understand this right (e.g. migrant workers)?
- Are there any grievances lodged concerning potential disregard of this right?
- Are workers able to evaluate imminent danger to know when to leave? Are they trained to have this awareness?
- Are there cases documented in the accident records where workers were unable to exit the premises despite evident danger?
- Is the management able to describe the protocol that directs workers to immediately leave the workplace or residential facilities in case of imminent danger?

7.9. Is there satisfactory evidence that the auditee ensures equipment, machinery and vehicles are maintained, timely replaced, including electrical installations and equipment?

Agriculture involves the use of a wide variety of hazardous machinery and processes (e.g., tractors, cultivators, harrows, seeding equipment, sprayers, harvesters, mowers, balers, grinders). Farm tractors are the most important piece of power equipment used in agriculture and are associated with a major proportion of injuries and deaths in agricultural production and maintenance.

Effectiveness: To assess the effectiveness of the way that the auditee ensures adequate safeguards for any machine, the auditor must at least consider that:

- Dangerous machines and equipment have adequate safety devices in place and the mobile parts are protected.
- Electrical equipment (connectors, wires, cables, fuses, housings, boxes, switches, etc.) is adequately installed and regularly inspected.
- All applicable safeguards for equipment are available and properly installed (e.g. Belt encasements; Grills for fans; The emergency switch-off).
- The auditee ensures valid inspection and insurance for machinery and vehicles as required by law. This may be the case for trucks, tractors and other potentially dangerous machines.
- The auditee ensures maintenance is carried out by competent personnel.
- The auditee keeps records of the maintenance, which includes:
  - Purpose and result of the maintenance.
  - Name of the competent person in charge.
  - Applicable insurance and its validity.
  - Next scheduled maintenance work.

Coherency check: Furthermore, the auditor shall consider that the way the auditee ensures adequate safeguards for any machine is consistent with the values and principles of amfori BSCI Code of Conduct

- Are workers properly instructed on how to handle potential hazards related to machines and vehicles?
- Are there documented cases in the accident records which resulted from machines and vehicles? Were lessons learned? If yes, how were those lessons integrated into the OHS procedure?
- Do workers who use machines and vehicles possess the adequate qualifications to use them in a safe manner?
7.10. **CRUCIAL QUESTION:** Is there satisfactory evidence that the auditee has installed an adequate amount of and properly working firefighting equipment?

**Effectiveness:** To assess the effectiveness of the way the auditee installs firefighting equipment; the auditor must at least consider that:

- The installation of firefighting equipment is in line with the OHS action plan developed as a result of the periodic risk assessment.
- The auditee follows national law specifications with regard to requirements for firefighting equipment. This usually includes:
  - Position and placement.
  - Size and effectiveness.
  - Maintenance and inspection requirements.
- There are functioning and sufficient fire extinguishers for workplace dimensions and activities.
- The firefighting equipment is:
  - Appropriate.
  - Distributed in an equal manner throughout the agriculture installations (warehouse, machinery storage), according to the identified risks (e.g. close to the machines, fertilizers, chemicals).
  - Placed at a height for it to be effective and easily accessible by workers.
  - Regularly inspected, with clear reference to the last serviced date and due date for the next inspection.
  - Operational.
  - Properly identified (inventoried) with clear reference to the last serviced date and due date for the next inspection.
  - The location of the fire extinguishers and the route to reach them are visually marked.
  - Early warning systems are installed and functioning in an adequate manner as required by the law: smoke sensors, fire alarms, alarm devices.
  - At least a relevant number of workers know how to use a fire extinguisher.

**Coherency check:** Furthermore, the auditor shall consider that the way the auditee installs firefighting equipment is coherent with the amfori BSCI values and principles.

- Is firefighting equipment functioning in a way that ensures a safe work environment?
- Are workers properly instructed on how to use firefighting equipment? Do they know the protocol to be followed in case of fire? Do they understand the warning signals?
- If there are other types of alarms being used in the workplace (e.g. end of shifts), are they clearly distinct from the fire alarm?
- Are there cases documented in the accident records resulting from fire? If yes, was the protocol followed?
- How often are the workers trained on the use of firefighting equipment? Are workers who deal with chemicals and other inflammable substances adequately trained?

7.11. **CRUCIAL QUESTION:** Is there satisfactory evidence that the auditee ensures that escape routes, aisles and emergency exits in the production site are not blocked, easily accessible and clearly marked?

This requirement is relevant in any enclosed space on the farm (e.g., farm workshops, animal housing, storage facilities).

**Effectiveness:** To assess the effectiveness of the way the auditee ensures accessible and visible escape routes, aisles and emergency exits for all workers; the auditor must at least consider that:

- Escape routes, aisles and emergency exits fully and simultaneously are:
- Not blocked.
- Easily accessible.
- Clearly marked.

- Workers and visitors can easily leave the premises in case of an incident without putting their lives at risk.
- The auditee approaches safe evacuation in a systemic and preventive manner, which includes:
  - Escape routes, aisles and emergency exits are:
    - Not blocked or locked during working time.
    - Marked without ambiguity.
  - Emergency lights and any other evacuation signals are properly installed, well-functioning and verified on a regular basis.
  - Production rooms with more than 10 workers have doors which open outwards unless the national law sets different specifications in which case the rule that provides higher protection to workers applies.

- The number of emergency exits directly relates to:
  - The number of workers.
  - The size and occupancy (e.g., with regard to population density) of the building.
  - The arrangement of the workplace.

**Coherency check:** Furthermore, the auditor shall consider that the auditee ensures safe, accessible, and visible escape routes, aisles and emergency exits in coherence with the amfori BSCI values and principles.

- Are escape routes, aisles and emergency exits defined in a way that ensure a safe work environment?
- Are workers properly instructed on how to use them? Do they understand the ways in which escape routes, aisles and emergency are visually marked? Do they know the easiest way to exit the workplace?
- Are there any internal regulations that conflict with the requirement of unblocked exits (e.g., for security reasons)?
- Are there cases in the documented accident records that show problems with the exits? Were any lessons learned and put into practice?

**7.12. Is there satisfactory evidence that the auditee ensures evacuations plans meet legal requirements and that these plans are posted in relevant places so workers can see and understand them?**

**Effectiveness:** To assess the effectiveness of how the auditee ensures evacuation plans, the auditor must at least consider that:

- The plans are easy to understand to evacuate both the production area and eventually the building, when necessary.
- Evacuation maps in the workplace must be displayed and at least identify the:
  - Current position on the premises of the person who is reading the plan.
  - Placement of the closest escape routes including emergency exits.
  - Placements of fire extinguishers and any other firefighting equipment.

- The auditee keeps in mind the cultural diversity, languages and education level of the workforce to design an effective way to communicate the evacuation plan.
- Workers understand the evacuation plan and know how to use it from their standpoints.
Coherency check: Furthermore, the auditor shall consider that the auditee ensures evacuation plans are coherent with the amfori BSCI values and principles.

- Are there cases in the documented accident records that show if the evacuation plans have been or are effective? If so, have these lessons informed current planning?
- How often are the workers trained on the evacuation plans? Are workers who deal with chemicals and other inflammable substances well-informed?

7.13. **CRUCIAL QUESTION:** Is there satisfactory evidence that the auditee ensures qualified first-aid is available at all times?

**Effectiveness:** To assess the effectiveness of the way the auditee ensures qualified first-aid provision, the auditor must at least consider that:

- The auditee respects national regulations concerning medical provisions.
- If there are no such legal regulations, the auditee ensures:
  - Adequate first-aid stations, rooms or vehicles.
  - Adequate first-aid kits.
  - Access to potable water, eye-wash stations and/or emergency showers close to workstations when immediate flushing with water is the recommended first-aid response.
  - A fully qualified person appointed to provide first-aid. Qualified staff shall be present in relevant numbers to address associated risks throughout the workplace.
  - A fully qualified person to verify the contents of the kit; who can also re-fill it.
  - Training on first aid and related procedures to ensure emergency treatment is always available.
- Where immediate flushing with water is the recommended through review of MSDS sheets. First-aid response, the auditee ensures that workstations are either equipped or very near to:
  - Potable water
  - Eye-wash stations
  - Emergency showers

Coherency check: Furthermore, the auditor shall consider that the way the auditee ensures qualified first aid is coherent with the amfori BSCI values and principles.

- Are adequate first-aid kits located in standard locations in the workshop? Tractors? Vehicles?
- Is there a fully qualified person appointed to provide first-aid? Is the working schedule of that person available? Are workers aware of who would replace that person?
- How often are workers trained on first aid?
- Are there cases that required first-aid as shown by the accident records? Were lessons learned? If yes, how have those lessons been integrated in the OHS procedure?
- Have workers who use machines, vehicles or those who handle chemicals or those who conduct any other risky activity been made well-aware of the first-aid protocol? Are vulnerable workers aware of the first-aid protocol?

7.14. **CRUCIAL QUESTION:** Is there satisfactory evidence that the auditee provides workers with potable and drinkable water at all times?

The right to potable and drinkable water applies to the workplace facilities including those where workers prepare or eat food as well as to the housing provided by the auditee.

Special attention shall be given to this right in countries and situations where the risk of dehydration may be higher due to hot/dry weather.
Effectiveness: To assess the effectiveness of the way the auditee ensures potable water; the auditor must at least consider that:

- Workers always have access to clean and cold potable water, not only during breaks.
- Access to water is not used as means for discrimination or as a disciplinary measure.
- Workers have access to clean potable water without risk of contagion.
- The auditee respects the characteristics and tests required for potable water as defined by national regulations.
- The auditee ensures that there are proper signs to identify water which is not potable in places where it is not mandatory that water be potable.

Coherency check: Furthermore, the auditor shall consider that the way the auditee ensures potable water is coherent with the amfori BSCI values and principles.

- Are workers aware of their right to potable water at all times? How often do they access water?
- How is water supply guaranteed? Who is responsible to ensure that water is always available? Do workers have access to water storage?

7.15. Is there satisfactory evidence that the auditee provides appropriate cooking and housing facilities & clean and safe accommodation for the workers and their families living on the farm/other facilities?

See ILO - Recommendation Workers’ Housing Recommendation N°115 - Recommendation R115 - Workers’ Housing Recommendation, 1961 (No. 115) (ilo.org)

Effectiveness: To assess the effectiveness of the way the auditee ensures appropriate cooking and housing facilities; the auditor must at least consider that:

- National law and custom should be fully respected in terminating the lease or occupancy of such housing on termination of the workers’ contracts of employment.
- The rents charged should be coherent and should not include in any case a speculative profit.
- The minimum space per person or per family shall be of reasonable dimensions and proportions (e.g. floor area; cubic volume; size and number of rooms).
- There is adequate sewage and garbage disposal systems.
- There is appropriate protection against heat, cold, damp, noise, fire, and disease-carrying animals, and in particular insects.
- There is adequate sanitary and washing facilities, ventilation, cooking and storage facilities and natural and artificial lighting.
- Where housing accommodation for single workers or workers separated from their families is collective, it should be:  
  - a separate bed for each worker.
  - separate accommodation of the sexes.
  - adequate supply of safe water.
  - adequate drainage and sanitary conveniences.
  - adequate ventilation and, where appropriate, heating; and
  - common dining rooms, canteens, rest and recreation rooms and health facilities, where not otherwise available in the community.
- The facilities are constructed in the most suitable materials available, having regard to local conditions, such as liability to earthquakes.
Coherency check: Furthermore, the auditor shall consider that the way the auditee ensures appropriate housing is coherent with the amfori BSCI values and principles.

- Does the auditee know the local law regarding housing?
- Are workers aware of their contract, and if the housing is included? Do they know the local prices for housing rental?
- Is the scheduled garbage pickup displayed? How are laundry service or rooms organised?
- Are workers satisfied with the areas provided by the auditee?
- How is the food stored to ensure it keeps its nutrients?
- Is there a grievance mechanism related to housing conditions?
- Are records available on the cleaning shifts for these areas? Is catering subcontracted? Is the menu displayed and are records kept?
- If there are no legal minimum criteria, does the auditee conduct assessments to define them in consultation with workers and their representatives?

7.16. Is there satisfactory evidence that the auditee provides workers with clean washing facilities, changing rooms and toilets that are also respectful of local customs?

Effectiveness: To assess the effectiveness of the way the auditee provides workers with clean washing facilities, changing rooms and toilets, the auditor must at least consider that:

- The auditee follows national regulations concerning the minimum number of washing facilities and toilets for the size of the farm.
- If there are no national regulations, the auditee determines its criteria based on the OHS risk-assessment and related action plan.
- The auditee is able to explain, during the audit, the reasons for having the amount of facilities it has and the plans to adapt the number if needed.
- The toilets are sanitary. This implies hygienic conditions, soap supply, working locks and separate wash room facilities for women and men.
- The auditee provides hygienic changing rooms when necessary for workers who change their clothes to perform their functions. This is particularly relevant for workers who handle hazardous substances or have to wear a uniform.
- The auditee provides access to clean showers for workers who are handling pesticides and chemicals.

Particular attention shall be devoted to ensure that facilities meet workers’ needs even when the number of workers increases (e.g. peak session).

Coherency check: Furthermore, the auditor shall consider that the ways in which the auditee provides workers with clean washing facilities, changing rooms and toilets are coherent with the amfori BSCI values and principles.

- Does the number of washing facilities, changing rooms and toilets meet the needs of the total number of workers?
- Are the needs according to gender taken into consideration?
- Does the auditee ensure the facilities meet workers’ needs even when the number of workers increases (e.g., peak session)?
- Are there any grievances about a potential lax and/or unsanitary approach in how these facilities are provided?
7.17. **CRUCIAL QUESTION:** Is there satisfactory evidence that the auditee provision of transportation to workers is safe and complies with national regulations?

If the auditee does not provide transportation to workers, the auditor shall answer this question Not Applicable and justify the answer under "Findings".

**Effectiveness:** To assess the effectiveness of the way the auditee provides transportation; the auditor must at least consider that:

- The transportation provided to workers (either directly or using third parties) is safe and complies with national regulations.
- The auditee ensures that vehicles unsuitable for human transportation are not used to commute workers (e.g. the use of agricultural vehicles for human transportation represents an additional risk for accidents).

**Coherency check:** Furthermore, the auditor shall consider that the way the auditee provides transportation is coherent with the amfori BSCI values and principles.

- Is the cost of transportation provided by the auditee in a transparent manner?
- Are there other alternatives for workers?
- Is the person in charge of driving workers to the site qualified to do so?

7.18. **Is there satisfactory evidence the auditee verifies that temperature, humidity, space, sanitation, illumination are adequate for the health and safety of workers?**

National law usually defines the characteristics for workplaces as well as social facilities and housing, so they provide a healthy and adequate environment for workers.

**Effectiveness:** To assess the effectiveness of the way the auditee verifies adequate temperature, humidity, space, sanitation, illumination, the auditor must at least consider that:

- Space and illumination are provided in an adequate way for workers’ specific activities.
- The auditee includes the assessment on temperature, humidity, space, sanitation and illumination as part of the OHS risk-assessment and related action plan.
- The auditee consults workers and their representatives as well as the person in charge of OHS.

The auditee shall be able to provide consistent information on the existing conditions; improvement plans (if any); timeline; to ensure these aspects of the workplace and social facilities fully respect workers’ health and safety.

**Coherency check:** Furthermore, the auditor shall consider that the way the auditee verifies adequate temperature, humidity, space, sanitation, illumination is coherent with the amfori BSCI values and principles.

- Are workers satisfied with the temperature, humidity, space, sanitation, illumination conditions?
- Are there any grievances concerning the quality of any of these aspects?
- How often are workers and their representatives consulted about these conditions?
- Are there cases documented in the accident records which show neglect for any of these conditions? Were lessons learned? If yes, how were those lessons integrated in the OHS procedure
8. Performance area 8: No Child Labour

8.1. CRUCIAL QUESTION: Is there satisfactory evidence that the auditee does not engage in illegal child labour directly or indirectly?

Children who are working who are younger than 15 years old (or younger than 14 years old in those countries that have set that age as the threshold), is regarded as child labour, unless it is “light work” (defined below).

Child labour occurs when work:
- Is done by a person who is younger than 15 years old (or someone who is younger than 14 years old in countries that set that age as the threshold).
- Is mentally, physically, socially and/or morally dangerous.
- Is harmful to children.
- Interferes with their schooling because it:
  - Deprives them of the opportunity to attend school.
  - Obliges them to leave school prematurely.
  - Requires them to attempt to combine school attendance with excessively long and heavy work.
- It is not “light work”

Light work refers to the participation of children or adolescents in work activities such as:
- Helping their parents around the home.
- Assisting in a family business.
- Earning pocket money outside school hours and/or during school holidays.

Light work is acceptable as long as:
- The child is at least 13 years old (or at least 12 years old in countries that have set a minimum age of 14).
- It does not prejudice their attendance to school or time dedicated to homework (e.g., maximum two hours in any working day).
- It does not take place on a continuous basis (e.g., school holidays).
- It is supervised by either parents or any other guardian who can ensure the tasks provided to children are not harmful for their health or interfering with their schooling.

A higher minimum age of 18 years is set for hazardous work which, by its nature or the circumstances under which it is carried out, is likely to jeopardise peoples’ health, safety and/or morals.

Effectiveness: To assess the effectiveness of how the auditee ensures not to engage in illegal child labour directly or indirectly, the auditor must at least consider that:
- The auditee has taken the necessary measures to:
  - Understand what child labour is, particularly by building the awareness of supervisors and recruitment staff.
  - Identify the likelihood of child labour in its industry or region.
  - Not engage child labour indirectly (e.g., using recruitment agencies, or allowing migrant or seasonal workers to use their own children to support them at work).
- The auditee keeps accurate records of:
  - Migrant and/or seasonal workers children’s names, ages, school schedules and information on their schools.
- Age and identity cards of workers engaged via recruitment agencies.
- Agencies’ recruitment procedures to avoid engagement of children or illegal workers (among others).
  o The auditee is aware of keeps contact details of the stakeholder(s) to be involved in the solution of child labour cases.

**Flagrant child labour:** If child labour is found during the audit, immediate actions shall be taken by the auditor at that very moment:

  o Identification of the child and his/her family
  o Determine if the case refers to accidental child labour (e.g., the auditee was led to believe the child was older) or if there is a case of the “worst form of child labour and exploitation”, which deserves different remediation
  o Follow the steps of the amfori BSCI Zero Tolerance protocol The auditor will do their best efforts to gather as much information as possible on:
    - How the child entered the job?
    - For how long has he or she been employed?
    - How has he or she been treated?
    - What has been the payment, working time and under what working conditions?
    - Has he or she been provided food and housing?
    - Are there other children onsite?
    - What is the child’s background?

**Immediate notification:** The issue needs to be notified immediately via the amfori BSCI Platform. (See amfori BSCI System Manual Part V - Annex 5: amfori BSCI Zero Tolerance Protocol)

**Coherency check:** Furthermore, the auditor shall consider that the way the auditee ensures not to engage in illegal child labour directly or indirectly is coherent with the amfori BSCI values and principles.

  o is the auditee vigilant that child labour is not engaged by its business partners?
  o Is the auditee particularly vigilant if it is based in a region with a high level of migration and seasonal workers?

8.2. **Is there satisfactory evidence that the auditee has established robust age-verification mechanisms as part of the recruitment process, which may not be in any way degrading or disrespectful to the worker?**

**Effectiveness:** To assess the effectiveness of the way the auditee establishes robust age-verification mechanisms, the auditor must at least consider that:

  o The recruitment procedures integrate the necessary measures to avoid or minimise the risk to hire minors. The risk is hire for work conducted in remote areas where:
    - Labour inspectors are less likely to reach.
    - Individuals have limited access to official identity cards.
  o The age-verification mechanism includes:
    - Training the person in charge of hiring workers and dealing with high-risk situations.
    - Training the person in charge of recruitment to “cross verify” interview techniques to find out the age of job candidates in interviews.
    - Regular cross verification of workers’ age with other stakeholders (e.g. recruitment agencies, previous employers).
- The age verification mechanism is triggered only in cases where the person in charge of recruitment may have doubts about the age claim.

Coherency check: Furthermore, the auditor shall consider that the way the auditee establishes robust age-verification mechanisms is coherent with the amfori BSCI values and principles.

- Are the questions in the recruitment process respectful to individuals?
- Does the age-verification mechanism take into consideration gender issues?
- Do workers usually have identification cards?
- Are medical check-ups used to support the verification of age?
- Is the auditee particularly vigilant if it is based in a region with a high level of migration and seasonal workers?
- Is the person in charge of human resources adequately trained on age verification?

8.3. **CRUCIAL QUESTION:** If there are children of employees living on the farm / other facilities, they have access to compulsory school education.

This criterion only applies if workers live on the farm or owner's facility, with their family.

Effectiveness: To assess the effectiveness of the way the auditee ensures the school attendance of children of employees; the auditor must at least consider:

- If the owner facilitates the school attendance (e.g., transportation).
- If the younger children have someone to take care of them (e.g., family member who does not work; caretaking).

Coherency check: Furthermore, the auditor shall crosscheck this information with workers interview, as there may not be any documentation!

- Does the worker have children?
- Are they attending school? From what age? To what age?
- What are the means of transportation?
9. **Performance area 9: Special Protection for Young Workers**

9.1. **CRUCIAL QUESTION:** Is there satisfactory evidence that the auditee ensures that young persons do not work at night and are protected against conditions of work which are prejudicial to their health, safety, morals and development?

**Effectiveness:** To assess that the young workers do not work at night and do appropriate tasks.

- The young workers are identified in the management system.
- The night workers are identified. There are no young workers working at night.
- The working contract / Job description provides a clear overview of the young workers tasks. Nothing is prejudicial to their health, development.
- The auditee knows and respects the local legislation about young workers (e.g. maximum weight to carry; night hours).

**Coherency check:** Furthermore, the auditor shall crosscheck documentation with young workers interviews:

- Has the auditee identified risks related to young workers?
- What kind of tasks are the young workers doing?
- What are the young workers’ working hours?

9.2. **CRUCIAL QUESTION:** Is there satisfactory evidence that young workers’ working hours do not prejudice their attendance at school, their participation in vocational orientation approved by the competent authority or their capacity to benefit from training or instruction programmes?

**Effectiveness:** To assess the effectiveness of the ways in which the auditee ensures working hours do not prejudice young workers, the auditor must at least consider that:

- The auditee respects young workers’ right to education.
- The auditee ensures that the combination of working time, school time and transport time do not exceed 10 hours in a day if workers are enrolled in:
  - Local compulsory education
  - Any other vocational orientation or training programmes approved by the competent authority.
- The auditee ensures that internal trainings are organised so young workers can attend. The timing of the trainings cannot coincide with young worker attendance to school or vocational training.

**Coherency check:** Furthermore, the auditor shall consider that the ways in which the auditee ensures working hours do not prejudice young workers are coherent with the amfori BSCI values and principles.

- Are young workers satisfied with the work schedule?
- Have there been any internal trainings organised at times when young workers could not attend?
- Are supervisors aware of the time that young workers work? Do they take additional measures to ensure young workers do not exceed the 10-hour daily limit (work, school, transport)?
9.3. Is there satisfactory evidence that the auditee seeks to ensure that young workers are properly trained on Occupational Health and Safety and have access to related training programmes?

**Effectiveness:** To assess the effectiveness of the way the auditee ensures young workers are properly trained on OHS; the auditor must at least consider that:

Young workers receive occupational health and safety training on the specific risks they face as young workers as well as those related to their specific tasks.

The auditee has documented these trainings, which include:

- Dates, schedule (which should not conflict with schooling or vocational training).
- Content.
- Trainer name and qualifications.
- Attendance list with attendee signatures.

**Coherency check:** Furthermore, the auditor shall consider that the way in which the auditee ensures young workers are properly trained on OHS is coherent with the amfori BSCI values and principles.

- Are young workers satisfied with the quality of trainings? Do they understand the specific risks associated with their tasks and how to manage them?
- Are there internal communication channels set up for young workers to report their concerns on OHS? Does the auditee pay particular attention to young female workers?
- Are there any grievances lodged about potential laxity in protecting young workers?
- What are the lessons learned? How are they integrated in the revision of the OHS action plan?
- Are supervisors made aware and instructed to provide support to young workers on OHS?

9.4. Is there satisfactory evidence that the auditee has a good overview of all young workers engaged in its production site?

**Effectiveness:** To assess the effectiveness of the way the auditee seeks to have the overview of all young workers engaged; the auditor must at least consider that:

- The auditee properly understands that young workers are more vulnerable than most workers.
- The auditee devotes extra efforts towards monitoring young workers' working conditions, particularly for seasonal work.
- The auditee has a good overview of young workers' work cycles in the organisation.
- Work cycle refers to:
  - The recruitment process
  - Remuneration.
  - Hours of work.
  - Disciplinary measures.
  - Promotion.
  - Trainings and termination of employment.
- The auditee collects and keeps specific records on young workers if required by law.

amfori BSCI provides the Template 7: Young Workers Data, which points to the minimum information needed on young workers.
Such records should be only destroyed in accordance with the national regulations for handling confidential information. See also Ethical Behaviour Performance Area.

**Coherency check:** Furthermore, the auditor shall consider that the overview the auditee keeps of all young workers engaged is both good and coherent with the amfori BSCI values and principles.

- Is the person responsible for human resources aware of the number of young workers engaged in the company?
- Does the auditee keep accurate records on young workers? Is the work cycle of young workers understandable from the records?
- Are there examples of young workers receiving promotions and/or disciplinary measures?
- Is young workers remuneration in line with the level of responsibility? Are there specific rules for remunerating apprentices?
- If the auditee claims to have a policy of not hiring young workers, what are the reasons behind it? Is the auditee aware of side effects for such a policy?
- Are the personal data of young workers handled in a respectful manner.
10. Performance area 10: No Precarious Employment

10.1. Is there satisfactory evidence that the auditee engages workers based on recognised and documented employment relationships?

Employment relations in agriculture might or might not be documented in formal written contracts. Verbal contracts, umbrella agreements (e.g., employment vouchers), or other frameworks based on local regulations or customs are common in agricultural production.

**Effectiveness:** To assess the effectiveness of the way the auditee engages workers; the auditor must at least consider that:

- The work relation is established in compliance with the framework that provides the greatest protection to workers:
  - National legislation.
  - Custom or practice.
  - International labour standards.
- The work relation is supported by means of documentary proof that makes the workers aware of their rights and obligations. Contracts are one of other possibilities (e.g., posters indicate the working rules).
- The auditee makes additional efforts to ensure workers understand their working conditions, particularly when workers:
  - Have difficulties to read and write.
  - Are migrants/foreigners.
  - Are hired for a short season or orally in line with customs.
- The auditee pays particular attention when using recruitment agencies. This includes:
  - Having a good overview on when, how and how much these workers are paid.
  - Keeping up-to-date records on these workers.

**Coherency check:** Furthermore, the auditor shall consider that the way the auditee engages workers is coherent with the amfori BSCI values and principles.

- Is the person responsible for human resources aware of the framework that provides the greatest protection to workers? (E.g., local custom stipulate additional social benefits)
- Does the auditee keep accurate records on workers’ work cycles?
- What kinds of additional efforts does the auditee make to ensure vulnerable workers understand the terms of their working conditions?
- Are vulnerable workers well-aware of their working conditions?
- Are workers representatives engaged to ensure additional sources of information?
- Are there any grievances lodged concerning potentially unrecognised working relations?

10.2. Is there satisfactory evidence that the auditee provides workers with understandable information before entering into employment?

**Effectiveness:** To assess the effectiveness of the way the auditee provides workers with understandable information before entering into employment, the auditor must at least consider that information is:

- Understandable: The auditee takes necessary measures to facilitate the understanding of working conditions information. This may require:
  - Translation into the language of workers.
- Audio and visual guidance for disabled workers as well as workers who have difficulties in reading and writing.

  - Relevant: The information refers to workers’ rights, obligations, and employment conditions. It includes information on:
    - Working hours.
    - Trainings.
    - Resting periods and holidays.
    - Remuneration and terms of payment.
    - Grievance mechanism.

  - Timely: The auditee provides the information before initiating the employment relationship.

  - The auditee provides the same necessary information to workers hired through recruitment agencies.

**Coherency check:** Furthermore, the auditor shall consider if the way the auditee engages workers is coherent with the amfori BSCI values and principles.

  - Is the person responsible for human resources aware of workers’ rights and obligations? Does that person explain them in an easy manner? Does the person speak other languages or dialects that can be preferred by workers?
  - How are workers who are engaged by recruitment agencies informed about their rights and obligations?
  - What kinds of additional efforts does the auditee make to ensure vulnerable workers understand their working conditions?
  - Are vulnerable workers well-aware of their working conditions?
  - Are workers representatives engaged to ensure additional sources of information?

**10.3. CRUCIAL QUESTION: Is there satisfactory evidence that the auditee does not use employment arrangements in a way that deliberately does not correspond to the genuine purpose of the law?**

Certain employment arrangements may represent an additional risk of undermining workers’ rights. This is the case for:

  - Apprenticeship schemes: when they are not used with intent to impart skills or provide regular employment.
  - Seasonal or contingency work: when they are used to cover permanent workflows that would require hiring workers on a permanent basis.
  - Labour-only contracting when the agent or broker uses its position to undermine the workers’ rights.
  - Subcontracting: when it is used to avoid reaching the minimum number of workers that allows the establishment of workers representatives or the right to unionise.

**Effectiveness:** To assess the effectiveness of the way the auditee uses employment arrangements; the auditor must at least consider that:

  - The auditee understands that these employment arrangements may undermine workers’ rights when used in a wrong way.
  - The auditee uses those employment arrangements in line with the genuine purpose of the law.
  - The auditee is able to explain the business logic behind its subcontracting practices and demonstrates that workers’ rights are guaranteed.
**Coherency check:** Furthermore, the auditor shall consider if the way the auditee uses employment arrangements is coherent with the amfori BSCI values and principles.

- Is the person responsible for human resources aware of the additional risks of these employment arrangements?
- How do workers engaged under these circumstances explain their rights and obligations?
- Are workers representatives engaged to ensure additional sources of information?
11. Performance area 11: No Bonded, Forced Labour or Human Trafficking

11.1. CRUCIAL QUESTION: Is there satisfactory evidence that the auditee does not engage in any form of servitude, forced, bonded, indentured, trafficked or non-voluntary labour?

**Effectiveness:** To assess the effectiveness of the ways in which the auditee ensures not to engage in bonded labour, the auditor must at least consider that:

- The auditee exercises due diligence to avoid engaging in any form of bonded labour.
- Managers, particularly supervisors and those in human resources, are aware of the procedures.
- The auditee takes necessary measures to understand what can be considered as bonded labour and which hiring, or engagement practices may introduce that risk.
- Workers shall have valid work permits.
- Workers’ engagement practices do not include any potential or actual risk of being qualified as forced labour. For example:
  - Lack of workers’ consent to work.
  - Intentional cruelty.
  - Coercion (e.g., debt bondage, restriction of movement, violence, threats or intimidation).
- The auditee does not request workers to leave personal documents in deposit.
- The auditee does not apply unlawful retention of wages or benefits.
- Workers do not work through any form of servitude, gratitude (e.g., negotiation of visa, housing, working only in exchange for training and education).
- Workers are granted the right to leave work and freely terminate their employment, provided that reasonable notice is given to the employer.
- Workers are allowed to leave the premises after working hours.
- If the auditee uses security guards (armed or unarmed), it ensures that they do not keep the workforce under retention.
- Workers are permitted to leave the production site and/or housing in their free time, without having to ask for permission.
- Workers are allowed to choose accommodation outside of the housing offered by the employer, if they have the possibility of doing so.

**Coherency check:** Furthermore, the auditor shall consider that the way the auditee ensures not to engage in bonded labour is coherent with the amfori BSCI values and principles.

- Is the person responsible for human resources aware of the additional risk of bonded labour when the auditee uses brokers?
- Does the auditee understand the risks of bonded labour? Does the auditee pay additional attention to avoid the risks?
- Are workers representatives engaged to ensure additional sources of information?
- Are there any grievances lodged concerning potential bonded labour?

11.2. Is there satisfactory evidence that the auditee acts rigorously and diligently when engaging and recruiting migrant workers both directly and indirectly?
Effectiveness: To assess the effectiveness of the ways in which the auditee acts diligently when recruiting migrant workers, the auditor must at least consider that:

- The auditee understands that migrant workers are more vulnerable than other workers to end up in forced labour situations.
- The auditee pays particular attention when engagement is indirect (e.g. via recruitment agencies).
- The auditee devotes attention to the following aspects:
  - Absence of state protection (both country of origin and host country).
  - Debt bondage (e.g. the worker had to pay a high recruitment fee to the agency and she/he lacks transparency of the terms of employment such as deductions and remuneration).
  - Restriction of movement (visa or travel documents are controlled by the agency or employer. Workers who do not understand the host country language may face more restricted movement).
  - In agriculture, any cultivation organised on a communal basis, by virtue of law or custom, is not regarded as compulsory cultivation as defined in the ILO Convention 29 (art. 19.2).

Coherency check: Furthermore, the auditor shall consider if the way in which the auditee recruits migrant workers is coherent with the amfori BSCI values and principles.

- Is the person responsible for human resources aware of the additional risks of bonded labour when engaging migrant workers?
- Does the auditee take additional preventive measures?
- Are workers representatives engaged to ensure additional sources of information?
- Are there any grievances lodged concerning the potential violation of migrant workers’ rights?

11.3. CRUCIAL QUESTION: Is there satisfactory evidence that the auditee does not subject workers to inhumane or degrading treatment, corporal punishment, mental or physical coercion and/or verbal abuse?

Effectiveness: To assess the effectiveness of how the auditee ensures workers do not receive degrading treatment, the auditor must at least consider that:

- The auditee understands what can be considered as degrading treatment.
- Workers are not subject to degrading treatment.
- The auditee does not tolerate corporal punishment or mental coercion as part of the auditee’s disciplinary measures.
- Supervisors are instructed to never punish workers corporally or mentally and there are consequences if they do so.
- The auditee pays particular attention to avoid degrading the most vulnerable workers such as migrants, seasonal workers, young workers or pregnant women.
- If collective housing is provided, dormitories ensure working conditions that respect workers’ dignity. For example:
  - Separate bed for each worker.
  - Separate locker for keeping personal belongings.
  - Separate accommodation for women and men.

Coherency check: Furthermore, the auditor shall consider that the way in which the auditee ensures workers do not receive degrading treatment is coherent with the amfori BSCI values and principles.

- Is management, particularly supervisors, aware that punishment or degrading treatment to workers is not allowed? Do they understand the consequences of contravening this?
- Does the auditee take additional preventive measures to avoid punishing or degrading workers?
Are workers representatives engaged to ensure additional sources of information?

Are there any grievances lodged concerning potential punishment of or degrading treatment toward workers?

11.4. **Is there satisfactory evidence the auditee has established all applicable disciplinary procedures in writing and has explained them verbally to workers in clear and understandable terms?**

**Effectiveness:** To assess the effectiveness of the way the auditee establishes disciplinary measures to workers; the auditor must at least consider that:

- Disciplinary procedures are means through which the employer deals with workers, when there are concerns about work, conduct or absence.
- Disciplinary procedures are in writing and workers can easily access them. They describe:
  - What performance and behaviour might lead to disciplinary action?
  - What kinds of actions the employer might take?
  - The steps involved to make decisions on measures to be taken.
- Disciplinary procedures shall include the name of a person who shall help the worker express her/his viewpoint or disagreement with any disciplinary measure.
- Disciplinary measures shall not facilitate a way for the auditee to unfairly take money from workers. Particular attention shall be given to the imposition of financial fees or deductions, which may be illegal (see also illegal deductions under Fair Remuneration Performance Area).

**Coherency check:** Furthermore, the auditor shall consider that the way the auditee establishes disciplinary measures is coherent with the amfori BSCI values and principles.

- Are the disciplinary procedures coherent and in line with the law?
- Is there documentary evidence on how they are implemented?
- Are workers aware of the disciplinary measures and do they understand the content and consequences?
- Are the workers representatives consulted and involved?

12.1. Is there satisfactory evidence that waste is managed in a way that does not lead to the pollution of the environment?

There are local areas where waste segregation and/or disposal are not managed by public authorities. This may lead to dumping waste into the environment. Even in the absence of national regulations, the auditee shall not dump waste into natural environments or burn it in open fires.

**Effectiveness:** To assess the effectiveness of the way the auditee manages its waste, the auditor must at least consider:

- How the auditee manages the waste, including packaging material.
- The auditee devotes particular attention to industrially contaminated water and hazardous waste.
- The auditee has procedures or processes in place to:
  - Identify and separate the type of waste generated (hazardous versus non-hazardous, including packaging).
  - Define any specific handling requirements (e.g., disposal via an authorised agent or to a specialised site).
  - Create awareness among workers about the waste generated onsite and the proper way to handle it.
  - Avoid dumping waste into natural environments.
  - Avoid burning waste in open fires.
  - Dispose of plastics and empty chemical containers without incurring environmental risks or harming humans.

**Coherency check:** Furthermore, the auditor shall consider that the auditee’s waste management is coherent with the amfori BSCI values and principles.

- Does the auditee understand the importance of proper waste management?
- Are the waste management practices relevant for the business activities?
- Are workers aware of the company policy procedures and processes for waste management?
- Are there any grievances lodged about potential irregular waste management?

12.2. Is there satisfactory evidence that water is managed in a way that respects the environment, particularly but not limited to preserving local water sources?

**Effectiveness:** To assess the effectiveness of the way the auditee manages water, the auditor must at least consider:

The auditee has mechanisms in place to promote water conservation and water waste reduction. This refers to water used for industrial purposes and personal consumption.

Possible mechanisms include:

- Licensed water use (when requested by the applicable law/authorities).
- Proper identification of water springs, rivers, lakes and other water ecosystems in the area.
- Documented risk assessments that justify management decisions on water use (e.g. irrigation in farms).
- Awareness raising on water waste reduction.
Coherency check: Furthermore, the auditor shall consider that the auditee’s water management is coherent with the amfori BSCI values and principles.

- Does the auditee understand the importance of proper water management?
- Are both management and workers aware of the local water sources and how they relate to the facility in terms of use, supervision and preservation?
- Are the water management practices in the company relevant for the business activities?
- Are workers aware of the company policy, procedures and processes for waste management?
- Are there any grievances lodged about potential irregular waste management?

12.3. Is there satisfactory evidence that the auditee applies precautionary measures in order to protect neighbouring communities and environment from the application of crop protection products?

Effectiveness: To assess the effectiveness of the way the auditee applies precautionary measures regarding the application for crop protection products, the auditor must at least consider:

- The local law is respected.
- Precautionary measures include at least:
  - Adequate machines / tools for efficient application,
  - Adequately calibrated machines / tools,
  - Timing of application optimized with regard to weather conditions and crop requirements in order to reduce the environmental impact to a minimum.
  - Preparation / mixing done in a way to minimise contamination.

Coherency check: Furthermore, the auditor shall consider that the auditee’s precautionary measures are coherent with the amfori BSCI values and principles.

- Is the auditee aware of local law regarding crop protection products application?
- Is the auditee aware of specific instructions regarding its own crop protection products?
- Who is doing this product application? Is this worker trained to do it?
- Is there any apparent risk of contamination? (e.g. river or houses located near the productions area)

12.4. Is there satisfactory evidence that the auditee takes adequate soil conservation and erosion control practices (e.g.: groundcover, planted hedges, crop residues, etc)?

Effectiveness: To assess the effectiveness of the way the auditee takes adequate soil conservation and erosion control practices; the auditor must at least consider:

- Eventual soil erosion problems and concerned areas directly related to the agricultural production are identified.
- Adequate measures are taken to monitor these problems: groundcover, planted hedges, crop residues, crop rotation, buffer zones, etc.

Coherency check: Furthermore, the auditor shall consider that the auditee’s soil conservation practices are coherent with the amfori BSCI values and principles.

- Is the auditee aware of soil erosion risks and soil conservation practices?
- What measures are taken by the auditee?
Which information / training do the auditee and the workers receive on this subject? (e.g. from local agricultural services; from business partners)

12.5. Is there satisfactory evidence that the auditee takes adequate overall soil fertility management practices to ensure long term productivity (crop rotation, use of leguminous crops, observation of soil life and structure)?

Soil fertility is crucial for agricultural productivity and therefore for food security. It can be maintained or increased through several management practices. Farmers can improve soil fertility and soil health by optimizing soil nutrient management in terms of maximizing net returns, minimizing the soil nutrients depletion, and minimizing nutrient losses or negative impacts on the environment (FAO - [http://www.fao.org/global-soil-partnership/areas-of-work/soil-fertility/en/]).

**Effectiveness:** To assess the effectiveness of the way the auditee takes adequate overall soil fertility management practice, the auditor must at least consider:

- The fertility is managed to ensure long term productivity;
- Some of the following practices are used:
  - Crop rotation.
  - Use of leguminous crops.
  - Observation of soil life and structure.
  - Mulching.
  - Preservation of native soil.
  - Observation of soil life and structure.
  - Avoid soil compaction (eg. with vehicle, tractors).

**Coherency check:** Furthermore, the auditor shall consider that the auditee’s soil fertility management is coherent with the amfori BSCI values and principles.

- Does the auditee understand the importance of fertility management (e.g. risks of over or excessive use of fertilizers on the crop and on the environment)?
- What measures are taken by the auditee?
- Which information / training do they receive on this subject and how are they shared with relevant workers? (eg. from local agricultural services; from business partners)
- Who is applying fertilizers? Are these workers trained for it?

13.1. Is there satisfactory evidence that the auditee actively opposes any act of corruption, extortion or embezzlement, or in any form of bribery in its activities as a business enterprise?

**Effectiveness:** To assess the effectiveness of the way the auditee opposes any act of corruption, the auditor must at least consider:

- The auditee identifies the situations and activities where acts of corruption, extortion or bribery are most likely to occur in its context.
- The auditee develops policies and procedures against any act of corruption and takes active measures to prevent and remediate them.

Particular attention needs to be given to the relations between auditor and auditee as well as between supervisors, recruitment agencies and subcontractors.

**Coherency check:** Furthermore, the auditor shall consider that the auditee’s ethical and active policies and procedures are coherent with the amfori BSCI values and principles.

- Does the auditee have a policy (e.g. amfori BSCI Code) in place that publicly condemns corruption, extortion and bribery as unacceptable unethical behaviours perpetrated in its business and sphere of influence?
- Which mechanisms does the auditee use to inform and train workers on the problem of corruption?
- Has the auditee identified where and how the major risks of corruption could occur?
- Does the auditee have procedures and processes in place to investigate and discourage any misbehaviour among the workers, particularly those with decision-making power?
- Does the auditee “reward” ethical behaviour and integrity among its workers and managers?
- Does the auditee include ethics and integrity in training given to workers and managers?
- Is the auditee aware of the perverse effects of corruption on its business and society in general?

13.2. Is there satisfactory evidence that the auditee keeps accurate information regarding its own activities, structure and performance?

Record keeping systems provide a solid foundation for filing, tracking and making available information on financial transactions, required documentation and workforce data.

Legal compliance departments should work closely with buyers and colleagues in CSR (if applicable) to ensure all personal information - on workers, business partners, clients and others - is carefully filed. It must comply with privacy laws and standards.

**Effectiveness:** To assess the effectiveness of record keeping on auditee activities, structure and performance, the auditor must at least consider that the information is:

- Accurate: Any information presented by the auditee must be true.
- Factual: Any claim made by the auditee in terms of its activity must be correct. (E.g.: Production volumes; number of workers; working hours; if hiring is direct or indirect)
- Structured: The information on different facilities and the way the auditee organises its production sites should be available and clear.
Coherency check: Furthermore, the auditor shall consider if the information gathering and filing is coherent with the amfori BSCI values and principles.

- Is there a follow-up on any previously reported audit or government inspection findings?
- Does the auditee disclose the information in accordance with applicable regulations and industry benchmark practices?

13.3. **CRUCIAL QUESTION:** Is there satisfactory evidence that the auditee takes the necessary measures to not being involved in falsifying information related to the activities, structure and performance nor in any act of misrepresentation in the supply chain?

The ethical behaviour of companies starts with how they run their businesses and operations. Fraud and misrepresentation in the supply chain adversely impact supply chain integrity. They can also lead to substandard or defective products. (e.g. use of prohibited substances, adulteration, fake origin of the products)

Falsification, fraud and misinterpretation are purposeful actions intended to cause harm or loss to another party, for one’s own direct or indirect gain.

**Effectiveness:** To assess the effectiveness of auditee measures, the auditor must at least consider that the auditee:

- Understands the severity of these unethical behaviours.
- Has a serious commitment and set of procedures or processes to avoid any such behaviour.
- Ensures proper investigation and disciplinary measures if any staff behave unethically.

Examples of misrepresentation in the supply chain include claims to be a trader or only a warehouse, to avoid audits of the production site(s).

The auditor shall trigger a Zero Tolerance alert if any flagrant falsification, fraud or misrepresentation is identified. For more information, see amfori BSCI System Manual Part V - Annex 5: amfori BSCI Zero Tolerance Protocol.

Coherency check: Furthermore, the auditor shall consider if the measures to avoid falsification or fraud are coherent with the amfori BSCI values and principles.

- Does the auditee understand the importance of avoiding falsification, fraud or misrepresentation?
- How are the unethical behaviours identified? How are they investigated? What do workers think about the disciplinary measures taken by the auditee (if any)?

13.4. **Is there satisfactory evidence that the auditee collects, uses and otherwise processes personal information with reasonable care and in accordance with privacy and information security laws and regulatory requirements?**

**Effectiveness:** To assess the effectiveness of how the auditee handles personal information, the auditor must at least consider that the auditee:

- Collects and processes personal data of individuals with the outmost respect for the individuals’ fundamental rights (particularly the right to privacy).
- Applies reasonable care to the personal information of directly hired workers, business partners, customers and consumers in the auditee’s sphere of influence.
- Pays special attention to the way in which it collects data in order to protect the vital interest of the worker (e.g. medical records).
- Collects and processes personal information in line with the applicable information security laws.
Coherency check: Furthermore, the auditor shall consider if the way the auditee handles personal information is coherent with the amfori BSCI values and principles.

- Does the auditee understand the importance of handling personal information respectfully?
- Is the information on workers treated adequately, particularly if they are vulnerable workers?
- Are the records, particularly those with private information, properly filed with the necessary guarantees?
- Are there any consequences for supervisors who disregard the ways in which personal information needs to be treated with respect?

13.5. Is there satisfactory evidence that the auditee did not involve involuntary resettlement and coercion when acquiring land and that there are legitimate land use rights according to formal and customary laws?

Effectiveness: To assess effectiveness the auditor must ensure that the auditee has legitimate land use rights:

- There is land use right documentation (if required by the law).

Particular attention needs to be given in the countries where land grabbing can be an issue.

Coherency check: Furthermore, the auditor shall consider through interviews and internet research:

- Is the auditee located in a country / area where land grabbing is an issue?
- Are there any grievances about land management?
- How long has the concerned land belong to the auditee?
- If there any land use rights documentation?
