How It Works

# How It Works. Assessment

Understanding how well your supply chain is managing environmental issues is key to defining what risks need to be addressed where.

**Environmental Performance** is assessed across the four (4) most relevant environmental areas for the producer site, plus Environmental Management Systems. Performance is measured at three levels.

## ASSESSMENT

4+1

1

### **BASIC** Legal Compliance

- Basic environmental management structure, with defined management responsibilities and environmental management controls in place
- Information to and training of employees/workers on relevant environmental, health and hazard issues
- Compliance with applicable legal requirements in defined Environmental Performance Areas (EPAs)

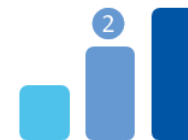

2

### **GOOD** Improvement

Environmental Management System (EMS) in place and effective:

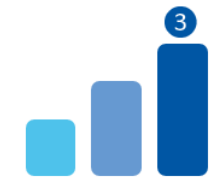

- Worker engagement at site level on environmental issues
- Environmental management and performance in line with recognised international standard practice
- Demonstrable management of all significant environmental aspects and impacts. Achievement of performance improvement targets.

3

### **ADVANCED** Leading Practice

- Stakeholder engagement by and in value chain to achieve significant performance improvement
- Consideration of potential impacts on, and influence over, activities beyond the immediate environs of the site
- Demonstrable leadership in environmental management and achievement of stretching performance improvement targets

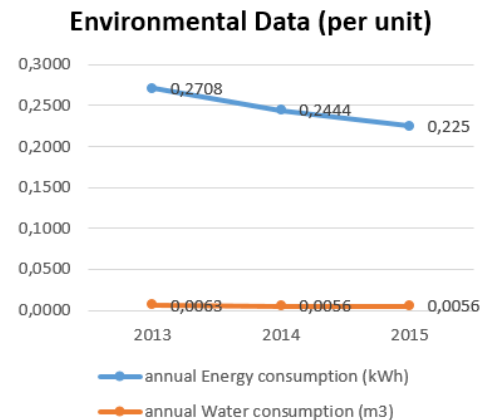

# How It Works. Assessment

The **Environmental Assessor** will:

- Validate the Environmental Data provided by the producer in the Self-Assessment
- Assess Legal Compliance
- Assess levels of Environmental Performance beyond legal compliance

## DATA VALIDATION

## ASSESSMENT

4+1

ON-SITE

## LEGAL COMPLIANCE

Legal requirements

Permits

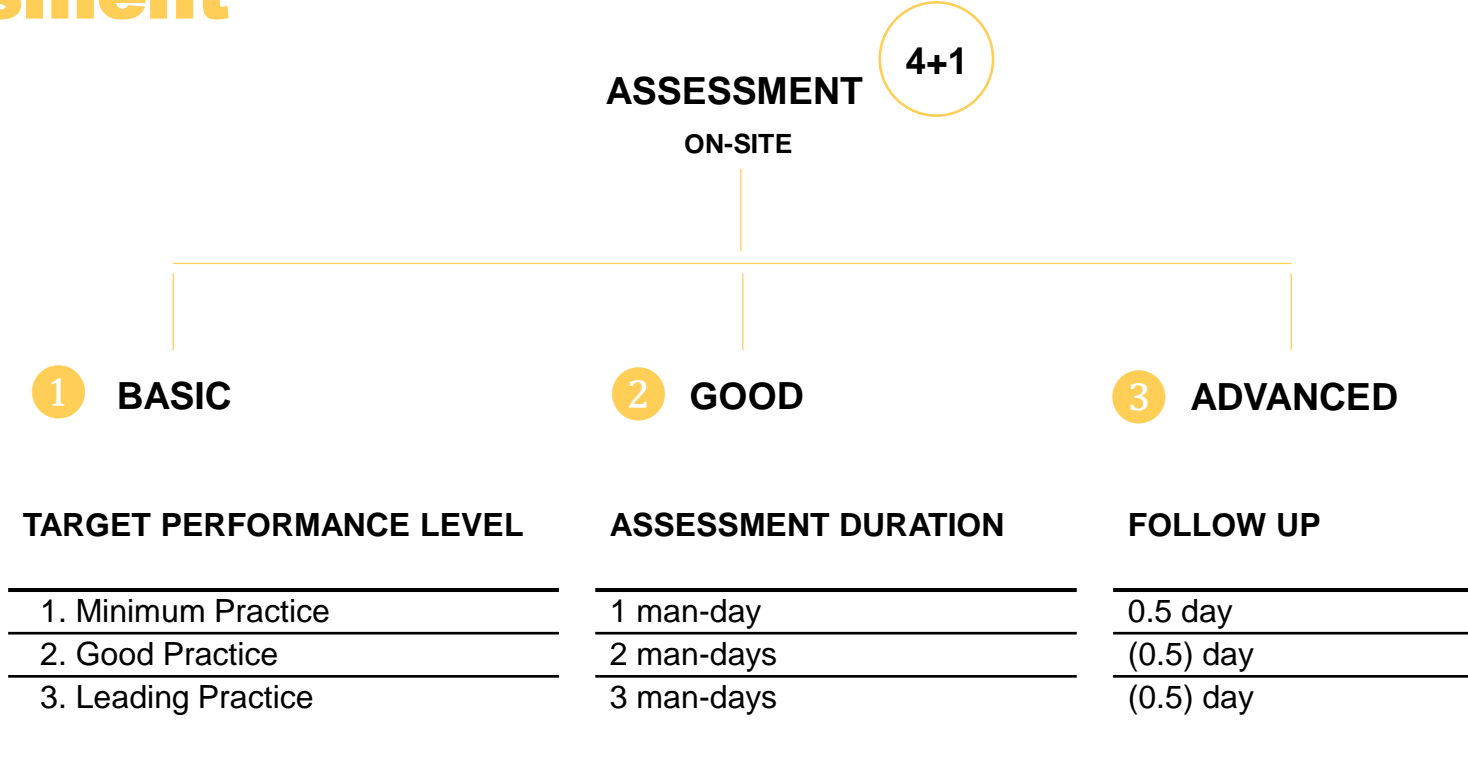

## PERFORMANCE

Environmental Management and Performance

# How It Works. Assessment

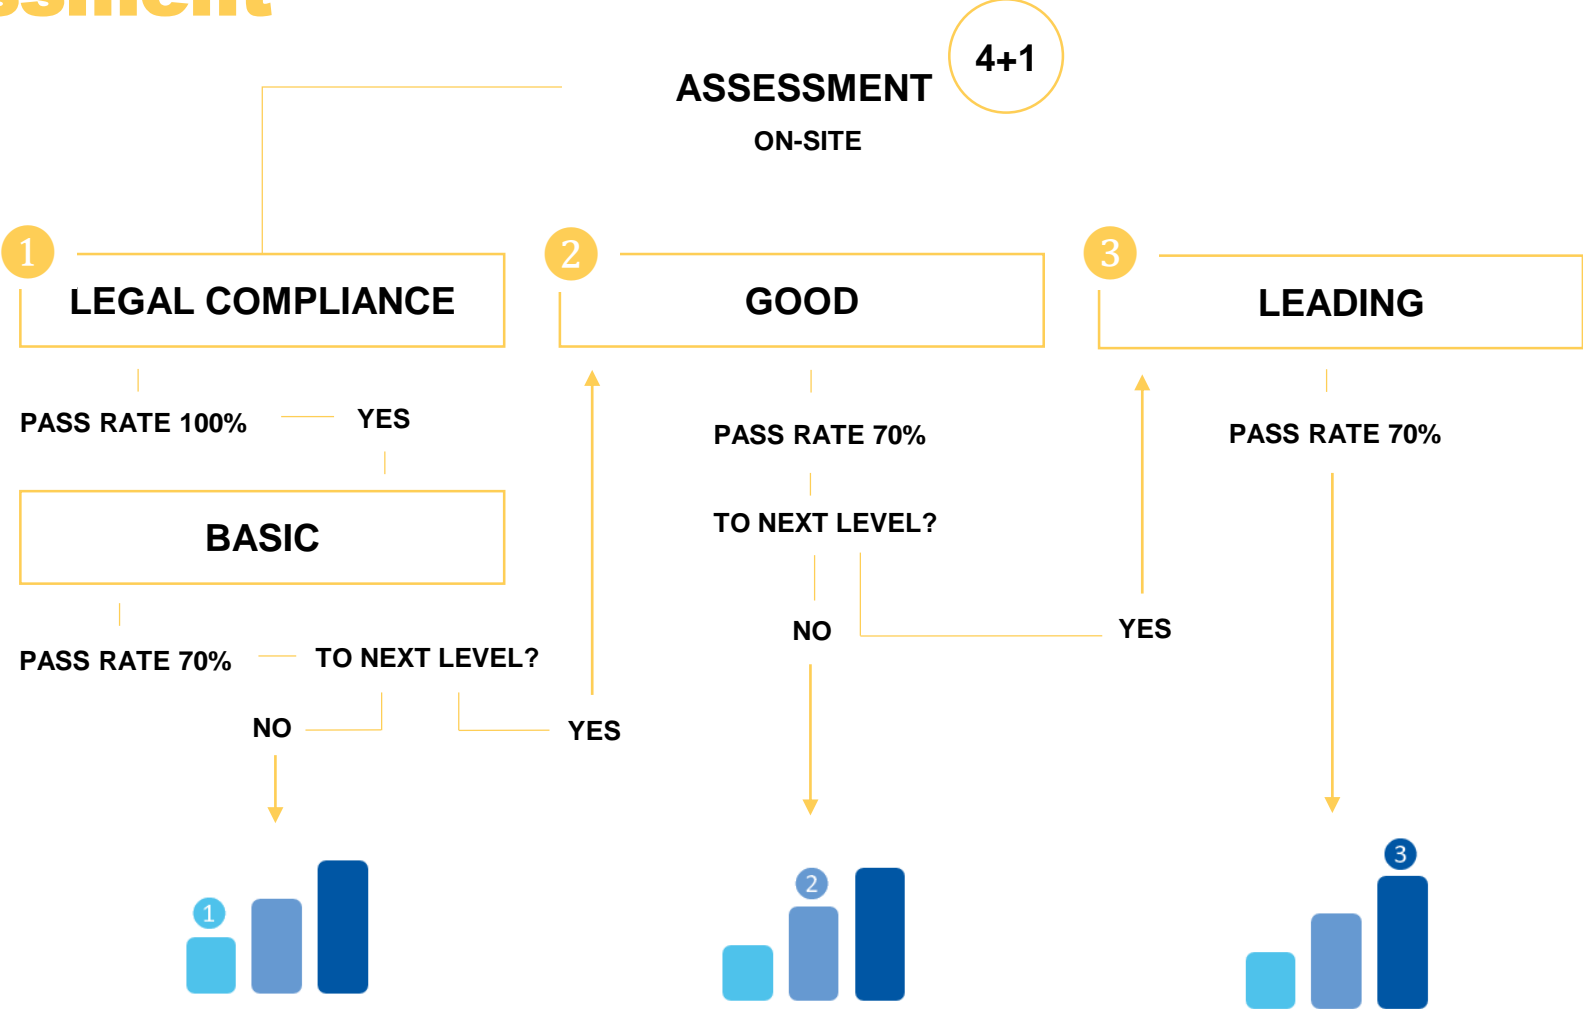

Select a **target performance level**, to manage and communicate expectations in your supply chain, and manage cost.

amfori BEPI PERFORMANCE LEVEL

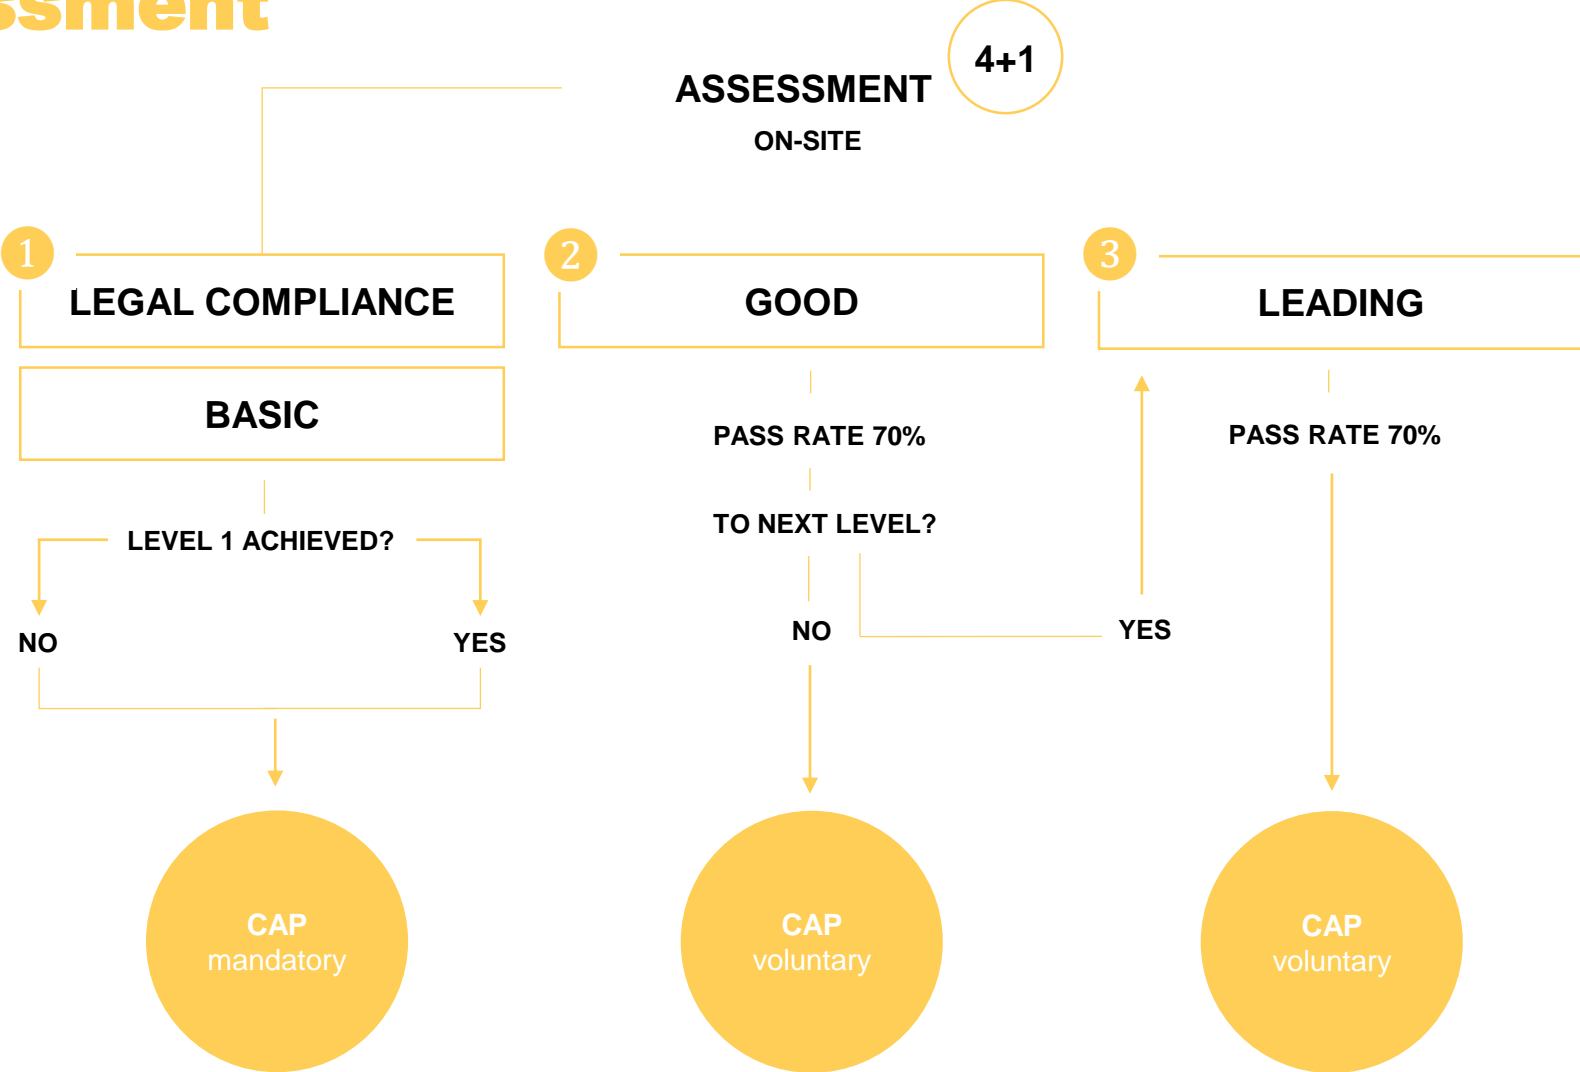

# How It Works. Assessment

During the assessment, the assessor will first respond to Level 1 questions. Only when a sufficient **pass rate** for this level has been achieved, will the assessor proceed to Level 2 questions.

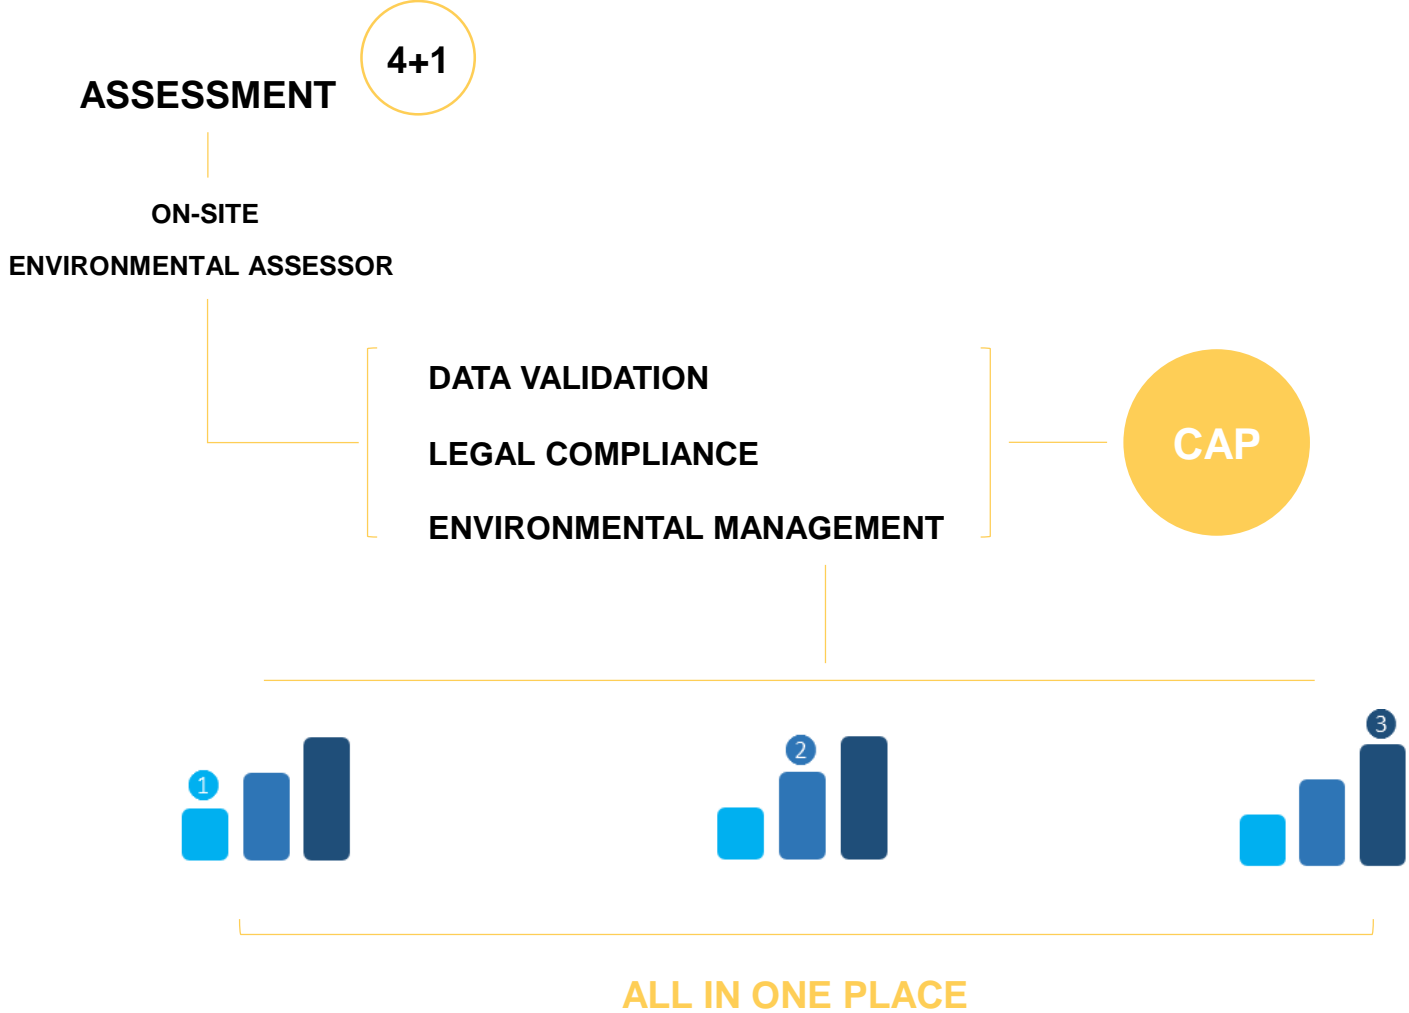

# How It Works. Assessment

A **Corrective Action Plan (CAP)** will support the producer in making improvements towards better environmental performance.

# How It Works. Assessment

The entire process is supported in the **amfori BEPI Platform**, facilitating every step and providing amfori BEPI Participants with easy access to their supply chain's efforts and progress.
