

## Mapping how we enable our members to contribute to the SDGs

# CHARTING OUR COURSE WITH THE SDGs

We support our member businesses in their contribution to the United Nations SDGs. For many SDGs, amfori offers its members approaches and tools, enabling companies of any size or sector to achieve impact through collaboration with us and throughout the wider sustainability ecosystem. By implementing our tools in their global supply chains, they can contribute to the achievement of numerous SDGs.

**SDG 3 Good Health and Well-Being:** We promote better occupational health and well-being practices through the amfori BSCI Code of Conduct and System Manual. Here, we offer tools to monitor, measure and manage emissions, energy and waste through amfori BEPI.

**SDG 4 Quality Education:** We support continuous education and training in the workforce through amfori BSCI, amfori BEPI and the amfori Academy to develop skills for workers across gender and age. As a consequence, a good education increases opportunities for a decent job.

**SDG 5 Gender Equality:** We launched the amfori Women Empowerment Programme to help ensure women have full access and equal opportunities to become leaders in the workforce, with a focus on China, India and Bangladesh.

**SDG 6 Clean Water and Sanitation:** We promote sustainable practices on water and wastewater management with our members and suppliers as well as producers to ensure access to clean water and sanitation for workers.

**SDG 7 Affordable and Clean Energy:** We encourage the use of the amfori BEPI Carbon Calculator to monitor greenhouse gas (GHG) emissions while providing energy management training through the amfori Academy.

**SDG 8 Decent Work and Economic Growth:** We support the drive for decent work and equal pay through amfori BSCI monitoring. Here, we provide training on issues such as child labour and labour rights through the amfori Academy as well as supporting these efforts through systematic due diligence and BSCI audits.

**SDG 12 Responsible Consumption and Production:** We promote the sustainable management and efficient use of natural resources through amfori BEPI. As a complement, we also offer training on environmental management through the amfori Academy.

**SDG 13 Climate Action:** amfori BEPI supports supply chains in terms of energy and emissions (e.g. the Carbon Calculator) and land use (e.g. amfori Timber Due Diligence Program). amfori Academy also offers training on energy management.

**SDG 15 Life on Land:** The amfori Timber Due Diligence Program and amfori Academy provide support to members in their due diligence efforts under the EU Timber Regulation. amfori BEPI also looks at land use and biodiversity.

**SDG 17 Partnerships for the Goals:** Collaboration is the cornerstone of amfori's network and activities, focusing on scaling for impact through partnership and empowerment.
