Trade with Purpose
Trade matters. It shapes the world. It drives innovation. It’s the single most effective, efficient agent of prosperity we have.

At amfori we leverage our expertise, influence and infrastructure to promote a different kind of trade – one that delivers real and sustainable social, environmental and economic benefits for everyone.

We call it Trade with Purpose.

21,000 social audits carried out in 2017

20,000+ users on our amfori Academy

50,000+ producers registered on our sustainability platforms
We are amfori

We are the leading global business association for open and sustainable trade. We empower over 2,000 members worldwide to monitor and improve their supply chains and shape a policy environment that supports their success.
amfori BSCI drives purpose-led trade by monitoring and improving social performance in supply chains.

**The benefits:**

- A code of conduct providing clear values and standards for addressing social issues in your supply chain
- A single interactive access point to monitor performance data with a visual dashboard
- Support from auditing services that are continuously updated and quality checked
- A clear and consistent approach to improve your business’s resilience and drive social performance
- Use of the amfori Academy’s empowering training, workshops and e-learning in over 10 languages
- Network Connect meetings that let members discuss their experiences and collaborate on best practice

**50,000+ producers registered on our sustainability platforms**
Since joining amfori BSCI, our company has benefited through improved working conditions in our Vietnam factory and even increased safety. We aim to be a good example for other factories in Vietnam, so the amfori BSCI Code can become standard working practice there."

Monique Ansink
Managing Director, Excellent Products
Sustainable sourcing is critically important – customers and stakeholders expect this from us as a retail company. amfori offers companies tools for achieving this, through improving labour conditions via amfori BSCI and tackling environmental challenges in the manufacturing process with amfori BEPI.”

Juerg von Niederhaeusern
Head of Social Compliance & Standards, Migros

MIGROS
amfori BEPI provides a range of services that enable companies to drive focused environmental improvements in their supply chain.

**The benefits:**

- Ability to gather data on 11 environmental areas
- A single interactive access point to monitor performance data with a visual dashboard
- Assess risks and gaps and receive relevant improvement advice through a four-step approach
- Use of our assessment tools to track environmental performance, increase your business’s resilience and drive improvements
- Use of the amfori Academy’s empowering training, workshops and e-learning in over 10 languages
- Network Connect meetings that let members discuss their experiences and collaborate on best practice

amfori Advocacy
Amplifying your voice

amfori Advocacy engages our members to create a single, collective voice. We bring diverse stakeholders together, empowering greater influence on policies that support open and sustainable trade for all.

Your challenges:
• Smooth customs procedures
• Smart product regulations
• Fair labour conditions
• Sustainable resource use

The benefits:
✓ A partner that stays on top of global political, legal and social developments that impact you
✓ Diverse learning opportunities with webinars and seminars
✓ Deep insight and engagement through our relationships with governmental and non-governmental partners and stakeholders
✓ Access to exclusive updates on open and sustainable trade policy issues
As well as being an excellent source of information, amfori offers its members an invaluable network of expertise and a real voice in discussions with EU bodies. Those connections and that leverage are the critical benefits amfori offers Decathlon.”

Olivier Ganne
Customs Director, Decathlon
Local Networks
Our Local Networks provide a way for members to exchange views and insights from a local perspective, discuss challenges, and get support tailored to their needs and language.

See where our members, Local Networks and Network Representatives are located:

Key:
- amfori members
- amfori Local Networks and Network Representatives
Our Network
Global engagement

We may be a global organisation but we also empower members to engage with their regional peers.

This local representation offers a powerful, supportive forum where members can foster a culture of sustainability while developing local solutions for challenges that are specific to their areas.

The benefits:

- Regular meetings help participants share information and good practices
- Networks help establish constructive dialogue with stakeholders
- Participants get expert guidance with a local focus

The United Nations’ 2030 Agenda for Sustainable Development shows how businesses can have a positive impact on society and the environment. With operations that stretch across continents and employ thousands of factories and farms, businesses can improve the lives of millions of workers and the health of the planet – but only when social and environmental performance goals are integrated throughout international supply chains.
